#### SM ENERGY COMPANY AND SUBSIDIARIES CONDENSED CONSOLIDATED STATEMENTS OF CASH FLOWS (UNAUDITED) (Continued)

Supplemental schedule of additional cash flow information and non-cash investing and financing activities:

	For the N		ns Endec 0,	l September	
	201	2011 2010			
		(in tho	usands)		
Cash paid for interest	\$	(24,095)	\$	(9,091)	
Net cash refunded for income taxes	\$	2,346	\$	24,949	

Dividends of approximately \$3.2 million have been declared by the Company's Board of Directors, but not paid, as of September 30, 2011. Dividends of approximately \$3.2 million were declared by the Company's Board of Directors, but not paid, as of September 30, 2010.

As of September 30, 2011, and 2010, \$271.5 million, and \$133.3 million, respectively, are included as additions to oil and gas properties and accounts payable and accrued expenses. These oil and gas property additions are reflected in cash used in investing activities in the periods that the payables are settled.

The accompanying notes are an integral part of these condensed consolidated financial statements.

#### SM ENERGY COMPANY AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

#### Note 1 - The Company and Business

SM Energy Company ("SM Energy" or the "Company") is an independent energy company engaged in the acquisition, exploration, exploration, development, and production of crude oil, natural gas, and natural gas liquids ("NGLs") in onshore North America, with a focus on oil and liquids-rich resource plays.

#### Note 2 - Basis of Presentation, Significant Accounting Policies, and Recently Issued Accounting Standards

#### Basis of Presentation

The accompanying unaudited condensed consolidated financial statements of SM Energy have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and the instructions to Form 10-Q and Regulation S-X. They do not include all information and notes required by generally accepted accounting principles for complete financial statements. However, except as disclosed herein, there has been no material change in the information disclosed in the notes to consolidated financial statements included in SM Energy's Annual Report on Form 10-K for the year ended December 31, 2010, (the "2010 Form 10-K"). In the opinion of management, all adjustments, consisting of normal recurring accruals that are considered necessary for a fair presentation of interim financial information, have been included. Operating results for the periods presented are not necessarily indicative of expected results for the full year. In connection with the preparation of its condensed consolidated financial statements, the Company evaluated subsequent events after the balance sheet date of September 30, 2011, through the filing date of this report.

#### Other Significant Accounting Policies

The accounting policies followed by the Company are set forth in Note 1 to the Company's consolidated financial statements in the 2010 Form 10-K, and are supplemented throughout the notes to condensed consolidated financial statements in this report. It is suggested that these condensed consolidated financial statements be read in conjunction with the consolidated financial statements and notes included in the 2010 Form 10-K. As discussed in *Note 10 - Derivative Financial Instruments*, as of January 1, 2011, the Company elected to discontinue cash flow hedge accounting on a prospective basis.

#### Recently Issued Accounting Standards

In May 2011, the Financial Accounting Standards Board ("FASB") issued new fair value measurement authoritative guidance clarifying the application of fair value measurement and disclosure requirements and changes particular principles or requirements for measuring fair value. This guidance is effective for interim and annual periods beginning after December 15, 2011. The Company is currently evaluating the provisions of this guidance and assessing the impact, if any, it may have on the Company's fair value disclosures.

In June 2011, the FASB issued new authoritative guidance that states an entity that reports items of other comprehensive income has the option to present the components of net income and comprehensive income in either one continuous financial statement, or two consecutive financial statements. This guidance is effective for interim and annual periods beginning after December 15, 2011. The Company is currently evaluating the provisions of this guidance and assessing the impact it will have on the Company's comprehensive income disclosures.

#### Note 3 - Divestitures and Assets Held for Sale

#### Eagle Ford Shale Divestiture

On August 2, 2011, the Company divested of certain operated Eagle Ford shale assets located in its South Texas & Gulf Coast region. This divestiture was comprised of the Company's entire operated acreage in LaSalle County, Texas, as well as an immaterial adjacent block of its operated acreage in Dimmit County, Texas. Total cash received, before marketing costs, was approximately \$226.9 million. The final sales price is subject to post-closing adjustments and is expected to be finalized in thefourth quarter of 2011. The estimated gain on this divestiture is approximately \$191.4 million. The Company determined the sale did not qualify for discontinued operations accounting under financial statement presentation authoritative guidance.

#### Mid-Continent Divestiture

In June 2011, the Company divested of certain non-strategic Constitution Field assets located in its Mid-Continent region. Total cash received, before marketing costs and Net Profits Interest Bonus Plan ("Net Profits Plan") payments, was approximately \$35.7 million. The final sales price is subject to post-closing adjustments and is expected to be finalized during the fourth quarter of 2011. The estimated gain on this divestiture is approximately \$28.4 million. The Company determined the sale did not qualify for discontinued operations accounting under financial statement presentation authoritative guidance.

#### Rocky Mountain Divestiture

In January 2011, the Company divested of certain non-strategic assets located in its Rocky Mountain region. Total cash received, before marketing costs and Net Profits Plan payments, was approximately \$45.5 million. The final gain related to the divestiture was approximately \$27.2 million. The Company determined the sale did not qualify for discontinued operations accounting under financial statement presentation authoritative guidance.

#### Assets Held for Sale

Assets are classified as held for sale when the Company commits to a plan to sell the assets and there is reasonable certainty the sale will take place withinone year. Upon classification as held for sale, long-lived assets are no longer depreciated or depleted and a measurement for impairment is performed to expense any excess of carrying value over fair value less costs to sell. Subsequent changes to estimated fair value less the cost to sell will impact the measurement of assets held for sale for which fair value is determined to be less than the carrying value of the assets.

As of September 30, 2011, the accompanying condensed consolidated balance sheets ("accompanying balance sheets") included \$105.9 million in book value of assets held for sale, net of accumulated depletion, depreciation and amortization and a corresponding asset retirement obligation liability is also separately presented. The above assets held for sale and asset retirement obligation liability amounts include certain assets located in Pennsylvania and the Company's gathering assets as described in *Note 12 - Acquisition and Development Agreement*. The Company determined these planned asset sales do not qualify for discontinued operations accounting under financial statement presentation authoritative guidance.

In July 2011, the Company entered into an agreement to divest Marcellus shale assets located in Pennsylvania that were classified as held for sale asteptember 30, 2011, for \$80.0 million subject to closing and post-closing adjustments. The agreement has an effective date of April 1, 2011. The agreement provided the purchaser with the option of extending the agreed upon closing date from October 15, 2011, to December 14, 2011, in exchange for an additional deposit. The purchaser has exercised this option and made the additional deposit. The closing of this transaction is subject to the satisfaction of certain closing conditions, including the resolution of any title defects exceeding specified levels. There can be no assurance that this transaction will be completed in the anticipated time frame, or at all.

#### Note 4 - Income Taxes

Income tax expense for the nine months ended September 30, 2011, and 2010, differs from the amounts that would be provided by applying the statutory U.S. federal income tax rate to income before income taxes as a result of the estimated effect of the domestic production activities deduction, percentage depletion, research and development credits, the effect of state income taxes, and other permanent differences.

The provision for income taxes consists of the following:

	Fo	For the Three Months Ended September 30,			For t	the Nine Months	Ended September		
		2011		2010		2011		2010	
				(in thou	isands)	)			
Current portion of income tax expense:									
Federal	\$	20,699	\$	2,194	\$	29,855	\$	10,410	
State		637		277		1,036		588	
Deferred portion of income tax expense		112,010		6,875		164,251		85,695	
Total income tax expense	\$	133,346	\$	9,346	\$	195,142	\$	96,693	
Effective tax rate		36.7 %		37.7%		36.7 %		37.7 %	
		9							

On a year-to-date basis, a change in the Company's effective tax rate between reported periods will generally reflect differences in its estimated highest marginal state tax rate due to changes in the composition of income from Company activities among state tax jurisdictions. Cumulative effects of state rate changes are reflected in the period legislation is enacted. Changes in the effective tax rate between periods also occur due to estimates for the domestic production activities deduction, percentage depletion, research and development credits, uncertain tax positions, valuation allowances, and for potential permanent state tax items which affect the presented periods differently due to oil and gas price variability and the impact of non-core asset sales. The quarterly rate can also be impacted by the proportion of income earned in reported periods.

The Company and its subsidiaries file income tax returns in the U.S. federal jurisdiction and in various states. With few exceptions, the Company is no longer subject to U.S. federal or state income tax examinations by these tax authorities for years before 2007. In the third quarter of 2011, the Company completed a research and development credit study and filed an amended 2007 federal return to claim a credit for that year. In the first quarter of 2011, the Company received a \$5.5 million refund from its 2006 tax year as a result of a net operating loss carryback claim from the 2008 tax year. In the fourth quarter of 2010, the Internal Revenue Service initiated an audit of the Company for the 2009 tax year. The audit was concluded in the second quarter of 2011 with a \$110,000 decrease to the Company's total 2005 refund claim of \$25.0 million. A quick refund claim of \$22.9 million from 2005 was received in the third quarter of 2010.

#### Note 5 - Long-Term Debt

#### Revolving Credit Facility

The Company executed a Fourth Amended and Restated Credit Agreement on May 27, 2011. This amended revolving credit facility replaced the Company's previous facility. The Company incurred \$8.7 million of deferred financing costs in association with the amended credit facility. Borrowings under the facility are secured by substantially all of the Company's proved oil and gas properties. The credit facility has a maximum loan amount of \$2.5 billion, with current aggregate lender commitments of \$1.0 billion, and a maturity date of May 27, 2016. On September 29, 2011, the lending group redetermined the Company's borrowing base under the credit facility at an amount of \$1.4 billion, up from \$1.3 billion. The borrowing base is subject to regular semi-annual redeterminations by the Company's lenders. The borrowing base redetermination process considers the value of the Company's oil and gas properties.

The Company must comply with certain financial and non-financial covenants under the terms of its credit facility agreement, including the limitation of the Company's dividends to no more than \$50.0 million per year. The Company was in compliance with all financial and non-financial covenants under the credit facility as of September 30, 2011, and through the filing of this report. Interest and commitment fees are accrued based on the borrowing base utilization grid below. Eurodollar loans accrue interest at the London Interbank Offered Rate plus the applicable margin from the utilization table below, and Alternate Base Rate ("ABR") and swingline loans accrue interest at Prime plus the applicable margin from the utilization table below. Commitment fees are accrued on the unused portion of the aggregate commitment amount and are included in interest expense in the accompanying condensed consolidated statements of operations ("accompanying statements of operations").

#### **Borrowing Base Utilization Grid**

Borrowing Base Utilization Percentage	<25%	≥25% <50%	≥50% <75%	≥75% <90%	≥90%
Eurodollar Loans	1.500%	1.750%	2.000%	2.250%	2.500%
ABR Loans or Swingline Loans	0.500%	0.750%	1.000%	1.250%	1.500%
Commitment Fee Rate	0.375%	0.375%	0.500%	0.500%	0.500%

The Company had no outstanding borrowings under its credit facility as of September 30, 2011. The Company had \$48.0 million of outstanding borrowings under its previous credit facility at December 31, 2010. The Company had \$999.4 million of available borrowing capacity under its current credit facility as of September 30, 2011, and had \$629.5 million of available borrowing capacity under its previous facility at December 31, 2010, when the aggregate commitment amount was \$678.0 million. The Company had two letters of credit outstanding for a total of \$608,000 at September 30, 2011, and had one letter of credit outstanding in the amount of \$483,000 at December 31, 2010. Outstanding letters of credit reduce the amount available under the commitment amount on a dollar-for-dollar basis.

#### 6.625% Senior Notes Due 2019

On February 7, 2011, the Company issued \$350.0 million in aggregate principal amount of 6.625% Senior Notes Due 2019 (the "6.625% Senior Notes"). The 6.625% Senior Notes were issued at par and mature on February 15, 2019. The Company received net proceeds of approximately \$341.1 million after deducting fees of approximately \$8.9 million, which will be amortized as deferred financing costs over the life of the 6.625% Senior Notes. The net proceeds were used to repay all borrowings under the Company's previous credit facility, and the remaining proceeds were used to fund the Company's ongoing capital expenditure program and general corporate purposes.

Prior to February 15, 2014, the Company may redeem up to 35 percent of the aggregate principal amount of the 6.625% Senior Notes with the net cash proceeds of one or more equity offerings at a redemption price of 106.625% of the principal amount thereof, plus accrued and unpaid interest. The Company may also redeem the 6.625% Senior Notes, in whole or in part, at any time prior to February 15, 2015, at a redemption price equal to 100% of the principal amount, plus a specified make whole premium and accrued and unpaid interest.

The Company may also redeem all or, from time to time, a portion of the6.625% Senior Notes on or after February 15, 2015, at the prices set forth below, during the twelve-month period beginning on February 15 of the applicable year, expressed as a percentage of the principal amount redeemed, plus accrued and unpaid interest:

2015	103.313%
2016	101.656%
2017 and thereafter	100.000%

The 6.625% Senior Notes are unsecured senior obligations and rank equal in right of payment with all of the Company's existing and any future unsecured senior debt and are senior in right of payment to any future subordinated debt. There are no subsidiary guarantors of the 6.625% Senior Notes. The Company is subject to certain covenants under the indenture governing the 6.625% Senior Notes that limit incurring additional indebtedness, issuing preferred stock, and making restricted payments in excess of specified amounts. The payment of dividends on the Company's common stock must comply with the restricted payment covenant; provided, however, the first \$6.5 million of dividends paid each year are not restricted by this covenant. To pay any additional dividends, the Company must comply with this covenant. The Company was in compliance with all covenants under its 6.625% Senior Notes as of September 30, 2011, and through the filing of this report.

Additionally, on February 7, 2011, the Company entered into a registration rights agreement that provides holders of the6.625% Senior Notes certain registration rights for the 6.625% Senior Notes under the Securities Act of 1933, as amended (the "Securities Act"). Pursuant to the registration rights agreement, the Company will file an exchange offer registration statement with the Securities and Exchange Commission with respect to an offer to exchange the 6.625% Senior Notes for substantially identical notes that are registered under the Securities Act. Under certain creation completed on or before February 7, 2012, or the shelf registration statement, if required, is not declared effective within the time periods specified in the registration rights agreement, then the Company has agreed to pay additional interest with respect to the 6.625% Senior Notes in an amount not to exceed one percent of the principal amount of the 6.625% Senior Notes until the exchange offer is completed or the shelf registration statement is declared effective.

#### 3.50% Senior Convertible Notes Due 2027

On April 4, 2007, the Company issued \$287.5 million in aggregate principal amount of 3.50% Senior Convertible Notes Due 2027 (the "3.50% Senior Convertible Notes"). The 3.50% Senior Convertible Notes mature on April 1, 2027, unless they are converted prior to maturity, redeemed, or purchased by the Company.

Holders of the 3.50% Senior Convertible Notes may elect to surrender all or a portion of their3.50% Senior Convertible Notes for conversion under certain circumstances, including during a calendar quarter if the closing price of the Company's common stock was more than 130 percent of the conversion price of \$54.42 per share for at least 20 trading days in the 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter. If holders elect to convert all or a portion of the 3.50% Senior Convertible Notes during a calendar quarter in which they are eligible to do so, they will receive cash, shares of the Company's common stock, or any combination thereof as may be elected by the Company under the indenture for the 3.50% Senior Convertible Notes. As of December 31, 2010, the 3.50% Senior Convertible. The closing price of the Company's common stock exceeded the conversion trigger price of \$70.75 per share for the quarter ended March 31, 2011; however,

none of the holders opted to convert their 3.50% Senior Convertible Notes during the second quarter of 2011. The closing price of the Company's common stock did not exceed the conversion trigger price for the quarters ended June 30, 2011, and September 30, 2011; therefore, the 3.50% Senior Convertible Notes were not eligible to be converted during the third quarter of 2011 and will not be eligible to be converted during the fourth quarter of 2011.

#### Note 6 - Earnings per Share

Basic net income per common share of stock is calculated by dividing net income available to common stockholders by the basic weighted-average common shares outstanding for the respective period. The Company's earnings per share calculations reflect the impact of any repurchases of shares of common stock made by the Company.

Diluted net income per common share of stock is calculated by dividing adjusted net income by the number of diluted weighted-average common shares outstanding, which includes the effect of potentially dilutive securities. Potentially dilutive securities for this calculation consist of unvested restricted stock units ("RSUs"), in-the-money outstanding options to purchase the Company's common stock, contingent Performance Share Awards ("PSAs") and contingent Performance Stock Units, and shares into which the 3.50% Senior Convertible Notes are convertible.

Performance Stock Units are structurally the same as the previously granted PSAs (collectively known as "Performance Stock Units" or "PSUs"). PSUs represent the right to receive, upon settlement of the PSUs after completion of the three-year performance period, a number of shares of the Company's common stock that may range from zero to two times the number of PSUs granted on the award date. The number of potentially dilutive shares related to PSUs is based on the number of shares, if any, which would be issuable at the end of the respective reporting period, assuming that date was the end of the contingency period. For additional discussion on PSUs, please refer to *Note 8 - Compensation Plans* under the heading *Performance Stock Units Under the Equity Incentive Compensation Plan.* 

The Company's 3.50% Senior Convertible Notes have a net-share settlement right giving the Company the option to irrevocably elect, by notice to the trustee under the indenture for the notes, to settle the Company's obligation to deliver shares of the Company's common stock, in the event that holders of the notes elect to convert all or a portion of their notes, by delivering cash in an amount equal to each \$1,000 principal amount of notes surrendered for conversion and, if applicable, at the Company's option, shares of common stock or cash, or any combination of common stock and cash, for the amount of conversion value in excess of the principal amount. For accounting purposes, the treasury stock method is used to measure the potentially dilutive impact of shares associated with this conversion feature. Shares of the Company's common stock traded at a quarterly average closing price exceeding the \$54.42 conversion price for the three and nine-month periods endedSeptember 30, 2011, making them dilutive for those respective periods. The 3.50% Senior Convertible Notes were not dilutive for the tree and nine-month periods endedSeptember 30, 2010.

The treasury stock method is used to measure the dilutive impact of unvested RSUs, contingent PSUs, and in-the-money stock options.

The following table sets forth the calculation of basic and diluted earnings per share:

	Fo	For the Three Months Ended September 30,			I	For the Nine Septer			
		2011		2010		2011		2010	
		ints)							
Net income	\$	230,097	\$	15,452	\$	336,127	\$	159,698	
Basic weighted-average common shares outstanding		63,904		63,031		63,665		62,914	
Add: dilutive effect of stock options, unvested RSUs, and contingent PSUs		2,062		1,763		2,589		1,685	
Add: dilutive effect of 3.50% Senior Convertible Notes		1,420		_		1,136		_	
Diluted weighted-average common shares outstanding		67,386		64,794		67,390		64,599	
Basic net income per common share	\$	3.60	\$	0.25	\$	5.28	\$	2.54	
Diluted net income per common share	\$	3.41	\$	0.24	\$	4.99	\$	2.47	

#### Note 7 - Commitments and Contingencies

During the second quarter of 2011, the Company entered into two natural gas gathering and services agreements whereby it is subject to certain natural gas gathering through-put commitments for up to ten years pursuant to each contract. The Company may be required to make periodic deficiency payments for any shortfalls in delivering the minimum applicable annual or semi-annual volume commitments. In the event that no gas is delivered in accordance with the agreements, the aggregate deficiency payments will total approximately \$726.2 million as of September 30, 2011. If a shortfall in the minimum volume commitment arises, the Company can arrange for third party gas to be delivered into the applicable gathering system and applied to the Company's minimum commitment.

During the first quarter of 2011, the Company entered into a hydraulic fracturing services contract. The total commitment is \$180.0 million over a two-year term commencing January 1, 2011. As of September 30, 2011, the remaining commitment was \$112.5 million. However, the Company's liability in the event of early termination of this contract without cause is not to exceed \$24.0 million. In the event of early termination of this contract with cause there is no termination fee.

The Company is subject to litigation and claims that have arisen in the ordinary course of its business. The Company accrues for such items when a liability is probable and the amount can be reasonably estimated. The Company currently has no such accruals. In the opinion of management, any adverse results in any such pending litigation and claims will not have a material effect on the results of operations, the financial position, or cash flows of the Company.

The Company is currently a defendant in litigation where the plaintiffs claim an aggregate overriding royalty interest of 7.46875 percent in production from approximately 22,000 of the Company's net acres in the Eagle Ford shale play in South Texas. The plaintiffs seek to quiet title to their claimed overriding royalty interest and seek the recovery of unpaid overriding royalty interest proceeds allegedly due. The Texas District Court issued an order granting plaintiffs' motion for summary judgment, but the Company believes that the summary judgment order is incorrect under the governing agreements and applicable law, and the Company intends to appeal and continue to contest the claim. The court entered judgment against all defendants awarding the plaintiffs damages of approximately \$5.1 million. If the plaintiffs were to ultimately prevail, the overriding royalty interest would reduce the Company's net revenue interest in the affected acreage. The Company does not currently believe that an unfavorable ultimate outcome is probable, nor that if the plaintiffs prevail there would be a material effect on the financial position of the Company. Based on the Company's current view of the facts and circumstances of the case, no accrual has been made for any loss.

The Company initiated an arbitration proceeding on May 11, 2011, against Anadarko E&P Company, LP ("Anadarko"), alleging that Anadarko breached a Joint Exploration Agreement ("JEA") originally executed between Anadarko and TXCO Energy Corp. ("TXCO") in March 2008, and relating to oil and gas properties located in Maverick, Dimmitt, Webb and LaSalle Counties, Texas. The Company has been a party to the JEA since May 15, 2008. The Company asserts that Anadarko is required under the JEA to tender to the Company its proportionate share of the leasehold interests that Anadarko acquired in TXCO's bankruptcy proceeding in February 2010. The arbitration hearing related to this dispute was held in September 2011; however, the arbitration panel has not announced its determination. If the Company prevails in this matter, Anadarko could be obligated to sell to the Company an undivided interest of up to 8.333% (or up to approximately 27,000 net acres) of the total leasehold governed by the JEA in return for the Company's payment of a proportionate share of the price Anadarko paid TXCO in the bankruptcy proceeding (adjusted for revenues and expenses attributable to the purchased interest since January 1, 2010), or in the alternative, pay the Company damages in an amount to be determined by the arbitration panel.

In a separate, unrelated matter, the Company initiated an arbitration proceeding against Springfield Pipeline, LLC ("Springfield"), a wholly owned affiliate of Anadarko Petroleum Corporation, and another party in October 2011, alleging that Springfield and the other party had unreasonably withheld or delayed consents, which are closing conditions of the Company's Acquisition and Development Agreement with Mitsui E&P Texas LP, and which are required (but are not to be unreasonably withheld or delayed) under an Agreement for the Construction, Ownership and Operation of Midstream Assets in Maverick, Dimmit, Webb and La Salle Counties, Texas, executed by the Company and Springfield and under certain other related gathering agreements. The Company has dismissed its claims in the arbitration proceeding against the other party in return for its consent. The Company has requested an expedited arbitration hearing under the commercial rules of the American Arbitration Association and is endeavoring to conclude this arbitration proceeding against Springfield during the fourth quarter of 2011.

#### Note 8 - Compensation Plans

#### Cash Bonus Plan

During the first quarters of 2011 and 2010, the Company paid \$21.6 million and \$7.7 million for cash bonuses earned in the 2010 and 2009 performance years, respectively. Within the general and administrative expense and exploration expense line items in

the accompanying statements of operations was \$3.8 million and \$3.1 million of accrued cash bonus plan expense related to the specific performance year for the three-month periods ended September 30, 2011, and 2010, respectively, and \$11.3 million and \$9.2 million for the nine-month periods ended September 30, 2011, and 2010, respectively.

#### Performance Stock Units Under the Equity Incentive Compensation Plan

PSUs are the primary form of long-term equity incentive compensation for the Company. The PSU multiplier is based on the Company's performance after completion of a three-year performance period. The performance criteria for PSUs is based on a combination of the Company's annualized total shareholder return ("TSR") for the performance period and the relative measure of the Company's TSR compared with the annualized TSR of an index comprised of certain peer companies for the performance period. In addition, there are separate employment service vesting provisions. PSUs are recognized as general and administrative and exploration expense over the vesting period of the award.

Total stock-based compensation expense related to PSUs for the three-month periods ended September 30, 2011, and 2010, wa\$5.9 million and \$5.6 million, respectively, and \$14.3 million and \$13.0 million for the nine-month periods ended September 30, 2011, and 2010, respectively. As of September 30, 2011, there was \$31.9 million of total unrecognized compensation expense related to unvested PSUs that is being amortized through 2014.

A summary of the status and activity concerning PSUs for the nine-month period ended September 30, 2011, is presented in the following table:

	PSUs	Weighted-Average Grant-Date Fair Value
Non-vested, at January 1, 2011	1,110,666	\$ 39.48
Granted	266,282	\$ 91.45
Vested <sup>(1)</sup>	(359,671)	\$ 35.53
Forfeited	(125,849)	\$ 32.89
Non-vested, at September 30, 2011	891,428	\$ 58.77

(1) The number of awards vested assumes a multiplier of one. The final number of shares vested may vary depending on the ending three-year multiplier, which ranges from zero to two.

During the third quarter of 2011, the Company granted a total of 266,282 PSUs as part of its regular annual long-term equity compensation process with a fair value of \$24.3 million. These PSUs will vest 1/7<sup>th</sup> on July 1, 2012, 2/7<sup>ths</sup> on July 1, 2013, and 4/7<sup>ths</sup> on July 1, 2014. During the third quarter of 2011, the Company settled 305,423 PSUs that related to awards granted in 2008 through the issuance of shares of the Company's common stock in accordance with the terms of the PSU awards. As a result, the Company issued a net of 206,468 shares of common stock associated with these grants. The remaining 98,955 shares were withheld to satisfy income and payroll tax withholding obligations that arose upon delivery of the shares underlying those PSUs.

#### Restricted Stock Units Under the Equity Incentive Compensation Plan

The Company grants RSUs for a portion of its annual long-term equity compensation. An RSU represents a right to receive one share of the Company's common stock to be delivered upon settlement of the RSU when it vests. Total RSU compensation expense for the three-month periods ended September 30, 2011, and 2010, was \$1.6 million and \$2.1 million, respectively, and \$3.6 million and \$5.7 million for the nine-month periods ended September 30, 2011, and 2010, respectively. As of September 30, 2011, there was \$9.2 million of total unrecognized compensation expense related to unvested RSU awards that is being amortized through 2014.

A summary of the status and activity concerning RSUs for the nine-month period ended September 30, 2011, is presented in the following table:

	RSUs	Weighted-Average Grant-Date Fair Value
Non-vested, at January 1, 2011	333,359	\$ 31.16
Granted	98,952	\$ 72.69
Vested	(105,554)	\$ 30.63
Forfeited	(17,270)	\$ 36.06
Non-vested, at September 30, 2011	309,487	\$ 44.34

During the third quarter of 2011, the Company granted a total of 90,665 RSUs as part of its regular annual long-term equity compensation process with a fair value of \$6.7 million. These RSUs will vest 1/7<sup>th</sup> on July 1, 2012, 2/7<sup>ths</sup> on July 1, 2013, and 4/7<sup>ths</sup> on July 1, 2014. During the first nine months of 2011, the Company settled 105,554 RSUs that related to awards granted in 2008, 2009 and 2010 through the issuance of shares of the Company's common stock in accordance with the terms of the RSU awards. As a result, the Company issued a net of 72,127 shares of common stock associated with these grants. The remaining 33,427 shares were withheld to satisfy income and payroll tax withholding obligations that arose upon delivery of the shares underlying those RSUs.

#### Stock Option Grants Under Prior Stock Option Plans

The following table summarizes stock option activity for the nine months ended September 30, 2011:

	Options	Weighted-       Average       Options     Exercise Price			Aggregate Intrinsic Value
Outstanding, January 1, 2011	920,765	\$	13.11	\$	42,192,057
Exercised	(366,117)	\$	12.22		
Forfeited	—	\$	—		
Outstanding, September 30, 2011	554,648	\$	13.69	\$	26,043,950
Vested and exercisable, September 30, 2011	554,648	\$	13.69	\$	26,043,950

As of September 30, 2011, there was no unrecognized compensation expense related to stock option awards.

#### Director Shares

During the nine months ended September 30, 2011, and 2010, the Company issued21,568 and 24,258 shares, respectively, of the Company's common stock held as treasury shares to the Company's non-employee directors. The shares were issued pursuant to the Company's Equity Incentive Compensation Plan. There was no compensation expense recorded for the three months ended September 30, 2011. The Company recorded \$33,000 of related compensation expense for the three months ended September 30, 2010, and \$1.0 million and \$748,000 of related compensation expense for the nine months ended September 30, 2011, and 2010, respectively.

#### Employee Stock Purchase Plan

Under the Company's Employee Stock Purchase Plan (the "ESPP"), eligible employees may purchase shares of the Company's common stock through payroll deductions of up to 15 percent of eligible compensation without accruing in excess of \$25,000 in fair market value from such purchases for each calendar year. The purchase price of the stock is 85 percent of the lower of the fair market value of the stock on the first or last day of the purchase period. The ESPP is intended to qualify under Section 423 of the Internal Revenue Code. The Company has set aside 2,000,000 shares of its common stock to be available for issuance under the ESPP, of which1,392,954 shares were available for issuance as of September 30, 2011. There were 22,373 and 27,456 shares issued under the ESPP during the first nine months of 2011 and 2010, respectively, with a six month minimum holding period. Shares issued under the ESPP on or after July 1, 2011, have no minimum holding period. The fair value of ESPP grants is measured at the date of grant using the Black-Scholes option-pricing model.

#### Net Profits Plan

Under the Company's Net Profits Plan, all of the Company's oil and gas wells that were completed or acquired during a year were designated within a specific pool. Key employees recommended by senior management and designated as participants by the Compensation Committee of the Company's Board of Directors ("Board") and employed by the Company on the last day of that year became entitled to payments under the Net Profits Plan after the Company had received net cash flows returning 100 percent of all costs associated with that pool. Thereafter, ten percent of future net cash flows generated by the pool are allocated among the participants and distributed at least annually. The portion of net cash flows from a pool to be allocated among the participants increases to 20 percent after the Company has recovered 200 percent of the total costs for the pool, including payments made under the Net Profits Plan at the ten percent level. In December 2007, the Board discontinued the creation of new pools under the Net Profits Plan. As a result, the 2007 Net Profits Plan pool was the last pool established by the Company.

Cash payments made or accrued under the Net Profits Plan that have been recorded as either general and administrative expense or exploration expense are detailed in the table below:

	For the Three Months Ended September 30,				nths er 30,		
	 2011		2010		2011		2010
			(in tho	ısands)			
General and administrative expense	\$ 4,229	\$	3,918	\$	14,820	\$	16,233
Exploration expense	507		638		1,569		1,896
Total	\$ 4,736	\$	4,556	\$	16,389	\$	18,129

Additionally, the Company accrued or made cash payments under the Net Profits Plan of \$686,000, relating to divestiture proceeds for the three months ended September 30, 2010, and \$6.3 million and \$20.8 million for the nine months ended September 30, 2011, and 2010, respectively. There were no cash payments made or accrued for relating to divestiture proceeds for the three months ended September 30, 2011. The cash payments are accounted for as a reduction of the gain on divestiture activity in the accompanying statements of operations.

The Company records changes in the present value of estimated future payments under the Net Profits Plan as a separate line item in the accompanying statements of operations. The change in the estimated liability is recorded as a non-cash expense or benefit in the current period. The amount recorded as an expense or benefit associated with the change in the estimated liability is not allocated to general and administrative expense or exploration expense because it is associated with the future net cash flows from oil and gas properties in the respective pools rather than results being realized through current period production. If the Company allocated the change in liability to these specific functional line items, based on the current allocation of actual distributions made by the Company, such expenses or benefits would predominately be allocated to general and administrative expense is minimal in comparison. Over time, less of the amount distributed relates to prospective exploration efforts as more of the amount distributed is to employees that have terminated employment and do not provide ongoing exploration support to the Company.

#### Note 9 - Pension Benefits

#### Pension Plans

The Company has a non-contributory pension plan covering substantially all employees who meet age and service requirements (the "Qualified Pension Plan"). The Company also has a supplemental non-contributory pension plan covering certain management employees (the "Nonqualified Pension Plan").

#### Components of Net Periodic Benefit Cost for Both Plans

The following table presents the components of the net periodic benefit cost for both the Qualified Pension Plan and the Nonqualified Pension Plan:

	For the Three Months Ended September 30,			For the Nine Months Ended Septe 30,			
	2011		2010		2011		2010
			(in thou	isands	s)		
Service cost	\$ 950	\$	848	\$	2,850	\$	2,544
Interest cost	296		280		888		840
Expected return on plan assets	(220)		(159)		(660)		(477)
Amortization of net actuarial loss	102		91		304		273
Net periodic benefit cost	\$ 1,128	\$	1,060	\$	3,382	\$	3,180

Prior service costs are amortized on a straight-line basis over the average remaining service period of active participants. Gains and losses in excess of ten percent of the greater of the benefit obligation or the market-related value of assets are amortized over the average remaining service period of active participants.

#### Contributions

The Company is currently required to contribute \$6.3 million to its Qualified Pension Plan for the 2011 plan year. The Company has contributed \$4.3 million as of September 30, 2011.

#### Note 10 - Derivative Financial Instruments

To mitigate a portion of the exposure to potentially adverse market changes in oil, natural gas, and NGL prices and the associated impact on cash flows, the Company has entered into various derivative commodity contracts. The Company's derivative contracts in place include swap and collar arrangements for oil, natural gas, and NGLs. As of September 30, 2011, and through the filing date of this report, the Company has commodity derivative contracts in place through the second quarter of 2014 for a total of approximately 9 MMBbls of anticipated crude oil production, 63 million MMBtu of anticipated natural gas production, and 2 MMBbls of anticipated NGL production.

The Company's oil, natural gas, and NGL derivatives are measured at fair value and are included in the accompanying balance sheets as derivative assets and liabilities. The Company derives internal valuation estimates that take into consideration the counterparties' credit ratings, the Company's credit rating, and the time value of money. These valuations are then compared to the respective counterparties' mark-to-market statements. The pertinent factors result in an estimated exit-price that management believes provides a reasonable and consistent methodology for valuing derivative instruments. The derivative instruments utilized by the Company are not considered by management to be complex, structured, or illiquid. The oil, natural gas, and NGL derivative markets are highly active. The fair value of the commodity derivative contracts was a net asset of \$70.3 million and a net liability of \$52.3 million at September 30, 2011, and December 31, 2010, respectively.

#### Discontinuance of Cash Flow Hedge Accounting

Prior to January 1, 2011, the Company designated its commodity derivative contracts as cash flow hedges, for which unrealized changes in fair value were recorded to accumulated other comprehensive income (loss) ("AOCIL"), to the extent the hedges were effective. As of January 1, 2011, the Company elected to de-designate all of its commodity derivative contracts that had been previously designated as cash flow hedges at December 31, 2010. As a result, subsequent to December 31, 2010, the Company recognizes all gains and losses from changes in commodity derivative fair values immediately in earnings rather than deferring any such amounts in AOCIL.

At December 31, 2010, accumulated other comprehensive loss ("AOCL") included \$18.6 million (\$11.8 million, net of income tax) of unrealized losses, representing the change in fair value of the Company's open commodity derivative contracts designated as cash flow hedges as of that balance sheet date, less any ineffectiveness recognized. As a result of discontinuing hedge accounting on January 1, 2011, such fair values at December 31, 2010 were frozen in AOCL as of the de-designation date and are reclassified into earnings as the original derivative transactions settle. During the nine months ended September 30, 2011, \$14.5 million (\$9.1 million, net of income tax) of derivative losses relating to de-designated commodity hedges were reclassified from

AOCL into earnings. As of September 30, 2011, AOCL included\$4.1 million (\$2.7 million, net of income tax) of unrealized losses on commodity derivative contracts that had been previously designated as cash flow hedges. The Company expects to reclassify into earnings from AOCL \$2.4 million, net of income tax, related to de-designated commodity derivative contracts during the next twelve months.

The following table details the fair value of derivatives recorded in the accompanying balance sheets, by category:

		As of September 30, 2011								
	Derivativ	Derivative Assets			Derivative Liabilities					
	Balance Sheet Classification	1	Fair Value	Balance Sheet Classification	F	air Value				
		(in thousan								
Commodity Contracts	Current Assets	\$	54,698	Current Liabilities	\$	21,106				
Commodity Contracts	Noncurrent Assets		39,891	Noncurrent liabilities		3,184				
Derivatives not designated as hedging instruments		\$	94,589		\$	24,290				

		As of December 31, 2010								
	Derivativ	Derivative Assets			Liabilities					
	Balance Sheet Classification	Fair Value		Balance Sheet Classification	F	air Value				
			(in tho	usands)						
Commodity Contracts	Current Assets	\$	43,491	Current Liabilities	\$	82,044				
Commodity Contracts	Noncurrent Assets		18,841	Noncurrent Liabilities		32,557				
Derivatives designated as hedging instruments		\$	62,332	-	\$	114,601				

The following table summarizes the unrealized and realized gains and losses on derivative cash settlements and changes in fair value of derivative contracts as presented in the accompanying statements of operations.

	 For the Three Months Ended September 30, 2011		ine Months Ended mber 30, 2011
	(in thou	isands)	
Cash settlement (gain) loss:			
Oil contracts	\$ 1,058	\$	18,421
Natural gas contracts	(1,434)		(3,751)
NGL contracts	4,131		9,478
Total cash settlement loss	\$ 3,755	\$	24,148
Unrealized (gain) loss on changes in fair value:			
Oil contracts	\$ (106,780)	\$	(90,629)
Natural gas contracts	(19,083)		(21,504)
NGL contracts	(6,317)		4,113
Total net unrealized (gain) on change in fair value	\$ (132,180)	\$	(108,020)
Total unrealized and realized derivative (gain)	\$ (128,425)	\$	(83,872)

The following table details the effect of derivative instruments on AOCIL and the accompanying statements of operations (net of income tax):

		Location on Consolidated	For	For the Three Months Ended September 30,		For the Nine Months End September 30,				
	Derivatives	Statement of Operations		2011 (in tho		2010 a)		2011 (in tho		2010 s)
Amount of loss reclassified from AOCIL to realized hedge (loss) gain	Commodity Contracts	Realized hedge (loss) gain	\$	4,271	\$	2,685	\$	9,149	\$	1,903

The realized net hedge loss for the three and nine-month periods endedSeptember 30, 2011, is comprised of realized cash settlements on commodity derivative contracts that were previously designated as cash flow hedges, whereas the realized net hedge gain for the three and nine-month periods ended September 30, 2010, is comprised of realized cash settlements on all commodity derivative contracts. Realized hedge gains or losses from the settlement of commodity derivatives previously designated as cash flow hedges are reported in the total operating revenues and other income section of the accompanying statements of operations. The Company realized a net hedge loss of \$6.8 million and a net hedge gain of \$8.8 million from its commodity derivative contracts for the three months endedSeptember 30, 2011, and 2010, respectively, and a net loss of \$14.5 million and a net gain of \$20.8 million from its commodity derivative contracts for the nine months endedSeptember 30, 2011, and 2010, respectively.

As noted above, effective January 1, 2011, the Company elected to de-designate all of its commodity derivative contracts that had been previously designated as cash flow hedges at December 31, 2010, and as such no new gains or losses are deferred in AOCIL atSeptember 30, 2011. The following table details the effect of derivative instruments on AOCIL and the balance sheets (net of income tax):

	Derivatives	Location on Consolidated Balance Sheets	Fo	r the Nine Months Ended September 30, 2010 (in the	-	or the Year Ended December 31, 2010
				(in the	usanusj	
Amount of gain on derivatives recognized in AOCIL during the period (effective portion)	Commodity Contracts	AOCIL	\$	50,136	\$	16,811

The Company has no derivatives designated as cash flow hedges at September 30, 2011. The following table details the ineffective portion of derivative instruments classified as cash flow hedges on the accompanying statements of operations for the three and nine-month periods ended September 30, 2010.

Location on Consolidated		Loss (Gain) Recognized in Earnings (Ineffective Portion)						
Derivatives Qualifying as Cash Flow Hedges			e Three Months Ended eptember 30, 2010	Fo	or the Nine Months Ended September 30, 2010			
		(in thousands)						
Commodity Contracts	Unrealized and realized derivative (gain) loss	\$	5,727	\$	(4,095)			

#### Credit Related Contingent Features

As of September 30, 2011, and through the filing of this report, all of the Company's derivative counterparties were members of the Company's credit facility syndicate. The Company's credit facility is secured by liens on substantially all of the Company's proved oil and gas properties; therefore such counterparties do not currently require the Company to post cash collateral in instances where the Company is in a liability position under its derivative instruments. No collateral was posted as of September 30, 2011, or through the filing of this report.

#### Convertible Note Derivative Instruments

The contingent interest provision of the 3.50% Senior Convertible Notes is an embedded derivative instrument. As of September 30, 2011, and December 31, 2010, the fair value of this derivative was determined to be immaterial.

#### Note 11 - Fair Value Measurements

The Company follows fair value measurement authoritative guidance for all assets and liabilities measured at fair value. That guidance defines fair value as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in an orderly transaction between market participants at the measurement date. Market or observable inputs are the preferred sources of values, followed by assumptions based on hypothetical transactions in the absence of market inputs. The hierarchy for grouping these assets and liabilities is based on the significance level of the following inputs:

- Level 1 quoted prices in active markets for identical assets or liabilities
- Level 2 quoted prices in active markets for similar assets and liabilities, quoted prices for identical or similar instruments in markets that are not active, and model-derived valuations whose inputs are observable or whose significant value drivers are observable
- Level 3 significant inputs to the valuation model are unobservable

The following is a listing of the Company's financial assets and liabilities that are measured at fair value and where they are classified within the hierarchy as of September 30, 2011:

	 Level 1		Level 2	Level 3
			(in thousands)	
Assets:				
Derivatives <sup>(a)</sup>	\$ —	\$	94,589	\$ —
Proved oil and gas properties (b)	\$ —	\$	—	\$ 19,113
Liabilities:				
Derivatives <sup>(a)</sup>	\$ —	\$	24,290	\$ —
Net Profits Plan (a)	\$ —	\$	—	\$ 108,489

(a) This represents a financial asset or liability that is measured at fair value on a recurring basis.

(b) This represents a nonfinancial asset that is measured at fair value on a nonrecurring basis.

The following is a listing of the Company's financial assets and liabilities that are measured at fair value on a recurring basis and where they are classified within the hierarchy as of December 31, 2010:

	Leve	l III	Level 2	Level 3				
		(in th	(in thousands)					
Assets:								
Derivatives	\$	— \$	62,332 \$	—				
Liabilities:								
Derivatives	\$	— \$	114,601 \$	—				
Net Profits Plan	\$	— \$	— \$	135,850				

Both financial and non-financial assets and liabilities are categorized within the hierarchy based on the lowest level of input that is significant to the fair value measurement. The following is a description of the valuation methodologies used by the Company as well as the general classification of such instruments pursuant to the hierarchy. There were no nonfinancial assets or liabilities measured at fair value on a nonrecurring basis at December 31, 2010.

#### Derivatives

The Company uses Level 2 inputs to measure the fair value of oil, natural gas, and NGL commodity derivatives. Fair values are based upon interpolated data. The Company derives internal valuation estimates taking into consideration the counterparties' credit ratings, the Company's credit rating, and the time value of money. These valuations are then compared to the respective counterparties' mark-to-market statements. The considered factors result in an estimated exit-price that management believes provides a reasonable and consistent methodology for valuing derivative instruments.

Generally, market quotes assume that all counterparties have near zero, or low, default rates and have equal credit quality. However, an adjustment may be necessary to reflect the credit quality of a specific counterparty to determine the fair value of the instrument. The Company monitors the credit ratings of its counterparties and may ask counterparties to post collateral if their ratings deteriorate. In some instances the Company will attempt to novate the trade to a more stable counterparty.

Valuation adjustments are necessary to reflect the effect of the Company's credit quality on the fair value of any liability position with a counterparty. This adjustment takes into account any credit enhancements, such as cash collateral that the Company may have posted with a counterparty, as well as any letters of credit between the parties. The methodology to determine this adjustment is consistent with how the Company evaluates counterparty credit risk, taking into account the Company's credit rating, current credit facility margins, and any change in such margins since the last measurement date. All of the Company's derivative counterparties are members of the Company's credit facility bank syndicate.

The methods described above may result in a fair value estimate that may not be indicative of net realizable value or may not be reflective of future fair values and cash flows. While the Company believes that the valuation methods utilized are appropriate and consistent with accounting authoritative guidance and with other marketplace participants, the Company recognizes that third parties may use different methodologies or assumptions to determine the fair value of certain financial instruments that could result in a different estimate of fair value at the reporting date.

#### Net Profits Plan

The Net Profits Plan is a standalone liability for which there is no available market price, principal market, or market participants. The inputs available for this instrument are unobservable and are therefore classified as Level 3 inputs. The Company employs the income approach, which converts expected future cash flow amounts to a single present value amount. This technique uses the estimate of future cash payments, expectations of possible variations in the amount and/or timing of cash flows, the risk premium, and nonperformance risk to calculate the fair value. There is a direct correlation between realized oil and gas commodity prices driving net cash flows and the Net Profits Plan liability. Generally, higher commodity prices result in a larger Net Profits Plan liability and vice versa.

The Company records the estimated fair value of the long-term liability for estimated future payments under the Net Profits Plan based on the discounted value of estimated future payments associated with each individual pool. The calculation of this liability is a significant management estimate. For those pools currently in payout, a discount rate of 12 percent is used to calculate this liability. A discount rate of 15 percent is used to calculate the liability for pools that have not reached payout. These rates are intended to represent the best estimate of the present value of expected future payments under the Net Profits Plan.

The Company's estimate of its liability is highly dependent on commodity prices, cost assumptions, and the discount rates used in the calculations. The Company continually evaluates the assumptions used in this calculation in order to consider the current market environment for oil and gas prices, costs, discount rates, and overall market conditions. The Net Profits Plan liability is determined using price assumptions of five one-year strip prices with the fifth year's pricing then carried out indefinitely. The average price is adjusted for realized price differentials and to include the effects of the forecasted production covered by derivatives contracts in the relevant periods. The non-cash expense associated with this significant management estimate is highly volatile from period to period due to fluctuations that occur in the crude oil, natural gas, and NGL commodity markets.

If the commodity prices used in the calculation changed by five percent, the liability recorded atSeptember 30, 2011, would differ by approximately \$9.1 million. A one percent increase in the discount rate would decrease the liability by approximately \$4.8 million whereas a one percent decrease in the discount rate would increase the liability by approximately \$5.3 million. Actual cash payments to be made to participants in future periods are dependent on realized actual production, realized commodity prices, and costs associated with the properties in each individual pool of the Net Profits Plan. Consequently, actual cash payments are inherently different from the amounts estimated.

No published market quotes exist on which to base the Company's estimate of fair value of the Net Profits Plan liability. As

such, the recorded fair value is based entirely on management estimates that are described within this footnote. While some inputs to the Company's calculation of fair value on the Net Profits Plan's future payments are from published sources, others, such as the discount rate and the expected future cash flows, are derived from the Company's own calculations and estimates.

The following table reflects the activity for the Net Profits Plan liability measured at fair value using Level 3 inputs:

	For the Three Months Ended September 30,			For the Nine Months I 30,			1	
	2011		2010		2011		2010	
	 (in thousands)							
Beginning balance	\$ 133,419	\$	136,420	\$	135,850	\$	170,291	
Net (decrease) increase in liability <sup>(a)</sup>	(20,194)		9,328		(2,001)		9,110	
Net settlements (a)(b)(c)	(4,736)		(5,242)		(25,360)		(38,895)	
Transfers in (out) of Level 3	—		_		—			
Ending balance	\$ 108,489	\$	140,506	\$	108,489	\$	140,506	

(a) Net changes in the Net Profits Plan liability are shown in the Change in Net Profits Plan liability line item of the accompanying statements of operations.

(b) Settlements represent cash payments made or accrued under the Net Profits Plan. The Company accrued or made cash payments under the Net Profits Plan relating to divestiture proceeds of \$686,000 for the three months ended September 30, 2010, and \$6.3 million and \$20.8 million for the nine months ended September 30, 2011, and 2010, respectively. There were no cash payments made or accrued relating to divestiture proceeds for the three months ended September 30, 2011.

(c) During the first quarter of 2011, the Company made the decision to cash out several Net Profits Plan pools associated with the acquisition of Nance Petroleum Corporation in 1999, through a \$2.6 million direct payment. As a result, the Company reduced its Net Profits Plan liability by that amount. There is no impact on the accompanying statements of operations for the three-month or nine-month periods ended September 30, 2011, related to these settlements.

#### 3.50% Senior Convertible Notes

Based on the secondary market trading price of the 3.50% Senior Convertible Notes, the estimated fair value of these notes was approximately \$357.2 million and \$351.0 million as of September 30, 2011, and December 31, 2010, respectively. The fair value of the embedded contingent interest derivative on the 3.50% Senior Convertible Notes was immaterial as of September 30, 2011, and December 31, 2010.

#### 6.625% Senior Notes

Based on the secondary market trading price of the 6.625% Senior Notes, the estimated fair value of these notes was approximately \$351.8 million as of September 30, 2011.

#### Proved Oil and Gas Properties

Proved oil and gas property costs are evaluated for impairment and reduced to fair value when there is an indication that the carrying costs exceed the sum of the undiscounted cash flows. The Company uses Level 3 inputs and the income valuation technique, which converts future amounts to a single present value amount, to measure the fair value of proved properties through an application of discount rates and price forecasts selected by the Company's management. The calculation of the discount rate is a significant management estimate based on the best information available and estimated to be 12 percent for the nine months ended September 30, 2011. Management believes that the discount rate is representative of current market conditions and reflects the following factors: estimate of future cash payments, expectations of possible variations in the amount and/or timing of cash flows, the risk premium, and nonperformance risk. The price forecast is based on New York Mercantile Exchange ("NYMEX") strip pricing, adjusted for basis differentials, for the first five years. Future operating costs are also adjusted as deemed appropriate for these estimates.

As a result of the impairment discussed in *Note 13 - Impairment of Proved Properties*, the proved oil and gas properties measured at fair value within the accompanying balance sheets were \$19.1 million at September 30, 2011. There were no proved oil and gas properties measured at fair value within the accompanying balance sheets at December 31, 2010.

#### Materials Inventory

Materials inventory is valued at the lower of cost or market. The Company uses Level 2 inputs to measure the fair value of materials inventory, which is primarily comprised of tubular goods. The Company uses third party market quotes and compares the quotes to the book value of the materials inventory. If the book value exceeds the quoted market price, the Company reduces the book value to the market price. The considered factors result in an estimated exit price that management believes provides a reasonable and consistent methodology for valuing materials inventory.

There were no materials inventory measured at fair value within the accompanying balance sheets at September 30, 2011, or December 31, 2010.

#### Asset Retirement Obligations

The income valuation technique is utilized by the Company to determine the fair value of the asset retirement obligation liability at the point of inception by applying a credit-adjusted risk-free rate to the undiscounted expected abandonment cash flows. The credit-adjusted risk-free rate takes into account the Company's credit risk, the time value of money, and the current economic state. Given the unobservable nature of the inputs, the initial measurement of the asset retirement obligation liability is deemed to use Level 3 inputs. There were no asset retirement obligations measured at fair value within the accompanying balance sheets atSeptember 30, 2011, or December 31, 2010.

Refer to Note 10 - Derivative Financial Instruments for more information regarding the Company's derivative instruments.

#### Note 12 - Acquisition and Development Agreement

In June 2011, the Company entered into an Acquisition and Development Agreement (the "Acquisition and Development Agreement") with Mitsui E&P Texas LP ("Mitsui"), an indirect subsidiary of Mitsui & Co., Ltd. Pursuant to the Acquisition and Development Agreement, the Company agreed to transfer to Mitsui a 12.5 percent working interest in certain non-operated oil and gas assets representing approximately 39,000 net acres in Dimmit, LaSalle, Maverick and Webb Counties, Texas. The agreement also provides for the conveyance of one-half of the Company's ownership in related gathering assets for the reimbursement by Mitsui of50 percent of costs incurred on those assets and paid by the Company through the closing date. If consummated, the effective date of the transfer would be March 1, 2011. As consideration for the oil and gas interests transferred, Mitsui has agreed to pay, or carry, 90 percent of certain drilling and completion costs attributable to the Company's remaining interest in these assets following the closing of the transaction, until Mitsui has expended an aggregate \$680.0 million on behalf of the Company. The Company estimates it will take three to four years to fully utilize the carry, based on the operator's announced current drilling plans. Mitsui would also reimburse the Company for capital expenditures and other costs, net of revenues, that the Company paid and attributable to the transferred interest during the period between March 1, 2011 and the closing date. The Company would apply these reimbursed costs to the remaining ten percent of the Company's drilling and completion costs for the affected acreage. The transaction was initially expected to close in the third quarter of 2011, subject to the satisfaction of closing conditions. Subsequent to September 30, 2011, the Company and Mitsui mutually agreed to extend the outside date for closing to December 23, 2011 to allow the parties to continue efforts to satisfy outstanding closing conditions, including obtaining required consents. There can be

#### Note 13 - Impairment of Proved Properties

The Company recorded \$48.5 million of proved property impairments on the Company's legacy James Lime assets for the three months endedSeptember 30, 2011, due primarily to low natural gas prices. There were no impairments of proved properties in the third quarter of 2010.

#### ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This discussion and analysis contains forward-looking statements. Refer to Cautionary Information about Forward-Looking Statements at the end of this item for an explanation of these types of statements.

#### Overview of the Company, Highlights, and Outlook

#### General Overview

We are an independent energy company engaged in the acquisition, exploration, exploitation, development, and production of crude oil, natural gas, and NGLs in onshore North America. Our assets include leading positions in the Eagle Ford shale and Bakken/Three Forks resource plays, as well as meaningful positions in the Granite Wash, Haynesville shale, and Woodford shale resource plays. We have built a portfolio of onshore properties in the contiguous United States primarily through early entrance into existing and emerging resource plays. This portfolio is comprised of properties with established production and reserves, prospective drilling opportunities, and unconventional resource prospects. We believe our strategy allows for stable and predictable production and reserves growth. Furthermore, by entering these plays early, we believe that we can capture larger resource potential at lower costs.

Our business strategy is to increase net asset value through attractive oil and gas investment activities, while maintaining a conservative capital structure and optimizing our capital expenditures. We focus our efforts on the exploration for and development of onshore, lower-risk resource plays in North America. We believe our inventory of resource plays is well suited for lower risk reserve and production growth due to the more predictable geologic profile of these types of assets. Furthermore, several of our assets produce significant volumes of oil and NGLs that limit our exposure to the current low natural gas price environment. Our strategy is based on the following:

- leveraging our core competencies in replicating resource play success in the drilling, completion, and development of oil, natural gas, and NGL reserves;
- · focusing on resource plays with lower geologic risk and high liquids content;
- exploiting our legacy assets and optimizing our asset base;
- · selectively acquiring leasehold positions in new and emerging resource plays; and
- · maintaining a strong balance sheet while funding the growth of our business.

In the third quarter of 2011, we had the following financial and operational results:

- Our average daily production for the three months endedSeptember 30, 2011, was 21.5 MBbls of oil, 281.2 MMcf of gas, and 8.6 MBbls of NGLs, for a record average equivalent production rate of 462.1 MMCFE per day, compared with 298.4 MMCFE per day for the same period in 2010. Please see additional discussion below under the caption *Production Results*.
- We recorded net income for the three months endedSeptember 30, 2011, of \$230.1 million or \$3.41 per diluted share compared to net income for the three months ended September 30, 2010, of \$15.5 million or \$0.24 per diluted share.
- Costs incurred for oil and gas producing activities for the three months endedSeptember 30, 2011, were \$440.3 million, compared with \$226.4 million for the same period in 2010. Please see additional discussion below under the caption Costs Incurred.

#### Oil, Gas, and NGL Prices

Our financial condition and the results of our operations are significantly affected by the prices we receive for oil, natural gas, and NGL production, which can fluctuate dramatically. Prior to 2011, we reported our natural gas production as a single stream of rich gas measured at the well head. As a result, we historically reported realized prices for our natural gas production for periods through December 31, 2010, that were higher than industry benchmarks due to the price uplift associated with incremental value contained in the higher BTU content of our produced gas stream. Beginning in the first quarter of 2011, we changed our reporting for natural gas volumes to show natural gas and NGL production volumes consistent with title transfer for each product. Projected rapid production growth from our rich gas assets with plant product sales contracts necessitated a change in our reporting of production volumes. Prior period production volumes, revenues, and prices have not been reclassified to conform to the current presentation given the immateriality of the NGL volumes produced in prior periods. We sell the majority of our natural gas under contracts that use first-of-the-month index pricing, which means that gas produced in a given month is sold at the first-of-the-month price regardless of the spot price on the day the gas is produced. For assets where high BTU gas is sold at the wellhead, we also receive additional value for the high energy content contained in the gas stream. Our NGL production is generally sold using contracts that pay us a monthly average of the posted Oil Price Information Service Mont Belvieu daily settlement prices, adjusting for processing, transportation, and location differentials. Our crude oil and condensate are sold using contracts that pay us either the average of the NYMEX WTI daily settlement price or the average of alternative posted prices for the periods in which the producet is produced, adjusted for quality, transportation, and location differentials.

The following table is a summary of commodity price data for the third quarters of 2011 and 2010 and the second quarter of 2011:

		For the Three Months Ended								
	Septem	ber 30, 2011		June 30, 2011		September 30, 2010				
Crude Oil (per Bbl):										
Average NYMEX price	\$	89.51	\$	102.28	\$	76.09				
Realized price	\$	82.63	\$	97.51	\$	68.56				
Natural Gas (per Mcf):										
Average NYMEX price	\$	4.12	\$	4.36	\$	4.28				
Realized price	\$	4.52	\$	4.63	\$	4.93				
Natural Gas Liquids (per Bbl):										
Average OPIS price	\$	61.85	\$	61.62	\$	—				
Realized price	\$	56.10	\$	54.02	\$	—				

Note: Prior year NGL production volumes, revenues, and prices have not been reclassified to conform to the current presentation given the immateriality of NGL volumes in prior periods. Please refer to additional discussion above. Average OPIS prices per barrel of NGL, historical or strip, are based on a product mix of 35% Ethane, 7% Isobutane, 11% Normal Butane, 15% Natural Gasoline and 32% Propane for all periods presented.

We expect future prices for oil, gas, and NGLs to be volatile. In addition to supply and demand fundamentals, the relative strength of the U.S. dollar will likely continue to impact crude oil prices. Historically, NGL prices have trended and correlated with the price for crude oil. The supply of NGLs is expected to grow in the near term as a result of a number of industry participants targeting projects that produce these products, which could increase supplies and negatively impact future pricing. Natural gas prices continue to face downward pressure as a result of high levels of drilling activity across the country. The 12-month strip prices for NYMEX WTI crude oil, NYMEX Henry Hub natural gas, and OPIS NGLs as of September 30, 2011, were \$80.26 per Bbl, \$4.11 per MMBTU, and \$55.18 per Bbl, respectively. Comparable prices as of October 25, 2011, were \$91.86 per Bbl, \$3.98 per MMBTU, and \$56.43 per Bbl, respectively.

While changes in quoted NYMEX oil and natural gas and OPIS NGL prices are generally used as a basis for comparison within our industry, the price we receive is affected by quality, energy content, location, and transportation differentials for these products. Our realized prices shown in the table above do not include the impact of cash settlements from derivative contracts, which is consistent with all prior periods reported.

#### Derivative Activities

We use financial derivative instruments as part of our financial risk management program. We have a Board-approved financial risk management policy governing our use of derivatives. The level of our production covered by derivatives is driven by the amount of debt on our balance sheet and the level of capital commitments and long-term obligations we have in place. With the derivative contracts we have in place, we believe we have established a base cash flow stream for our future operations and partially reduced our exposure to volatility in commodity prices. Our use of collars for a portion of the derivatives allows us to participate in upward movements in oil, gas, and NGL prices while also setting a price floor for a portion of our production. Please see *Note 10 — Derivative Financial Instruments* of Part I, Item 1 of this report for additional information regarding our oil, gas, and NGL derivatives, and see the caption, *Summary of Oil, Gas, and NGL Derivative Contracts in Place*, below.

As of January 1, 2011, we elected to de-designate all commodity derivative contracts that had previously been designated as cash flow hedges as of December 31, 2010, and to discontinue hedge accounting prospectively. Accordingly, beginning January 1, 2011, all of our derivative contracts are stated at fair value each quarter. The changes in the fair value of these contracts result in gains and losses, which are recognized immediately in earnings. For the three and nine months ended September 30, 2011, realized cash settlements from our commodity risk management program resulted in losses of \$10.6 million and \$38.7 million, respectively. For the three and nine months ended September 30, 2011, fluctuations in the fair value of our commodity risk management program portfolio of derivative contracts resulted in unrealized gains of \$132.2 million and \$108.0 million, respectively.

The following table is a reconciliation from our realized prices to our adjusted price for the commodities indicated, including the effects of derivative cash settlements for the third quarters of 2011 and 2010 and the second quarter of 2011:

		For the Three Months Ended					
	Septem	nber 30, 2011	Jı	une 30, 2011	Septe	mber 30, 2010	
Crude Oil (per Bbl):							
Realized price	\$	82.63	\$	97.51	\$	68.56	
Less the effects of derivative cash settlements		(7.61)		(13.11)		(4.28)	
Adjusted price, including the effects of derivative cash settlements	\$	75.02	\$	84.40	\$	64.28	
Natural Gas (per Mcf):							
Realized price	\$	4.52	\$	4.63	\$	4.93	
Plus the effects of derivative cash settlements		0.37		0.38		0.88	
Adjusted price, including the effects of derivative cash settlements	\$	4.89	\$	5.01	\$	5.81	
Natural Gas Liquids (per Bbl):							
Realized price	\$	56.10	\$	54.02	\$	—	
Less the effects of derivative cash settlements		(6.39)		(6.53)		_	
Adjusted price, including the effects of derivative cash settlements	\$	49.71	\$	47.49	\$		

Note: Prior year NGL production volumes, revenues, and prices have not been reclassified to conform to the current presentation given the immateriality of the volumes in prior periods. Please refer to additional discussion above under the caption Oil, Gas, and NGL Prices.

In July 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act was enacted into law. This financial reform legislation includes provisions that require over-the-counter derivative transactions to be executed through an exchange or centrally cleared. The Dodd-Frank Act requires the Commodities Futures Trading Commission (the "CFTC"), the SEC, and other regulators to establish rules and regulations to implement the new legislation. The CFTC has proposed new rules governing margin requirements for uncleared swaps entered into by non-bank swap entities, and U.S. banking regulators have proposed new rules regarding margin requirements for uncleared swaps entered into by bank swap entities. The ultimate effect of the proposed new rules and any additional regulations on our business is currently uncertain. Of particular concern to us is whether the provisions of the final rules and regulations will allow us to qualify as a non-financial, commercial end user exempt from the requirements, are to be established through regulatory rulemaking. Although we cannot predict the ultimate outcome of these rulemakings, new rules and regulations in this area may result in increased costs and cash collateral requirements for the types of derivative instruments we use to manage our financial risks related to volatility in oil, gas, and NGL commodity prices.

#### Third Quarter 2011 Highlights

Operational Activities. We operated an average of 12 drilling rigs company-wide during the third quarter of 2011. The focus of our operated drilling activity this year has been on oil and NGL-rich gas programs and selected natural gas projects of potential strategic importance to us. We have also participated in higher levels of outside-operated activity in oil and NGL-rich gas plays.

We had four drilling rigs running in our operated Eagle Ford shale program in South Texas at the end of the third quarter of 2011. We focused our drilling in areas with higher BTU gas content and condensate yields. We continue to test different ways to complete and space these wells to optimize future development potential. These tests include the near simultaneous fracturing of multiple wells, as well as increased density drilling to test wells spaced as close as 625 feet apart. Testing of these concepts are at various stages of maturity and we are evaluating results. In September 2011, the third party owned and operated Eagle Ford Gathering, LLC pipeline was placed into service, which increased our total wet gas takeaway capacity in the play. During the third quarter, we closed our previously announced divestiture of approximately 15,000 net operated acres in LaSalle and Dimmit Counties, Texas. This transaction closed on August 2, 2011, at which time we received approximately \$226.9 million in cash proceeds, subject to post-closing adjustments. As part of this transaction, we also assigned a small portion of our committed takeaway capacity to service these assets. After the closing of this transaction involving our outside-operated Eagle Ford assets. This agreement calls for the transfer of a 12.5 percent working interest in our non-operated acreage in exchange for the carry of90 percent of our drilling and completion costs in the same acreage for an amount not to exceed \$680.0 million. This agreement also provides for the divestiture of one-half of our interest in the gathering assets that service these non-operated assets in exchange for reimbursement of 50 percent of our costs on those assets. The outside closing date for this transaction has been extended to December 23, 2011, and is subject to the satisfaction of closing conditions, including the receipt of certain consents. There can be no assurance that this transaction will be completed in the anticipated time frame, or at all. If this transaction clo

We operated three drilling rigs in the Williston Basin throughout the third quarter of 2011, all of which focused on Bakken and Three Forks drilling in our Raven and Gooseneck prospects in McKenzie and Divide Counties, North Dakota. Our drilling results in these prospects have continued to meet or exceed our expectations throughout the first nine months of 2011. During the third quarter, we were able to recommence drilling and completion work as well as restart previously shut-in production related to assets affected by weather and flooding during the first half of the year. Elsewhere in the Rocky Mountain region, we continued to test the Niobrara formation in both southeastern and central Wyoming with one drilling rig. We drilled three additional test wells in the first nine months of 2011 for a total of five test wells in southeastern Wyoming, south of Silo Field, where we have approximately 26,500 net acres. In addition, during the quarter, we have initiated the drilling of our first horizontal test well targeting the Niobrara formation in the Powder River Basin where we have approximately 64,700 net acres.

In our Mid-Continent region, we operated two rigs in our Granite Wash program in the Texas Panhandle and western Oklahoma during the third quarter of 2011 to test and delineate our acreage in the play. We have approximately 34,000 net acres in the Granite Wash, which are held by production.

In our ArkLaTex region, we operated one rig in our Haynesville shale program during the third quarter of 2011, with a focus on getting the acreage to held by production status. By getting the acreage held by production, we will hold both Haynesville and Bossier interests in the acreage with the expectation we would benefit from any future improvement in natural gas prices. We anticipate that we can drill the remaining six wells required to hold this acreage by production by the third quarter of 2012.

Our Permian region operated a one rig program during the third quarter of 2011, splitting its focus between the testing of Wolfberry down spacing and drilling Mississippian targets as part of our exploration effort.

Production Results. The table below provides a regional breakdown of our production during the third quarter of 2011:

	Mid-Continent	ArkLaTex	South Texas & Gulf Coast	Permian	Rocky Mountain	Total (1)
Third Quarter 2011 Production:						
Oil (MBbl)	85.7	12.9	668.7	324.7	889.4	1,981.4
Gas (MMcf)	6,977.4	7,279.2	9,716.9	882.4	1,018.2	25,874.1
NGLs (MBbl)	37.4	22.2	721.4	3.4	8.1	792.4
Equivalent (MMCFE)	7,715.7	7,489.6	18,057.5	2,851.1	6,403.4	42,517.3
Avg. Daily Equivalents (MMCFE/d)	83.9	81.4	196.3	31.0	69.6	462.1
Relative percentage	18%	18%	42%	7%	15%	100%

<sup>(1)</sup> Totals may not add due to rounding.

For the third quarter of 2011, our production was led by our South Texas & Gulf Coast region due to the ongoing drilling activities in our Eagle Ford shale program. Please refer to *Comparison of Financial Results and Trends Between the Three Months Ended September 30, 2011, and 2010* for additional discussion on production.

Costs Incurred. The following table sets forth the costs incurred for our oil and gas activities for the third quarter of 2011:

		e Three Months eptember 30, 2011
	(in	thousands)
Development costs	\$	347,052
Facility costs		34,288
Exploration costs		31,908
Acquisitions of unproved properties		27,004
Total, including asset retirement obligations	\$	440,252

Our capital and exploration activities reflect higher cash flows provided by operating activities, divestiture proceeds, and proceeds from the issuance of our 6.625% Senior Notes.

*Eagle Ford Shale Divestiture.* In August 2011, we completed the divestiture of certain operated Eagle Ford shale assets located in our South Texas & Gulf Coast region. This position comprised our entire operated acreage in LaSalle County, Texas, as well as an immaterial adjacent block of our operated acreage in Dimmit County, Texas. Total cash received, before marketing costs, was approximately \$226.9 million, subject to post-closing adjustments. The estimated gain on this divestiture is approximately \$191.4 million.

*Marcellus Divestiture*. During the third quarter of 2011, we entered into an agreement to divest of our Marcellus shale assets, including associated infrastructure, located in north central Pennsylvania for \$80.0 million, subject to closing and post-closing adjustments. These assets were classified as assets held for sale at September 30, 2011. The agreement has an effective date of April 1, 2011. The agreement provided the purchaser with the option of extending the agreed upon closing date from October 15, 2011, to December 14, 2011, in exchange for an additional deposit. The purchaser has exercised this option and made the additional deposit. The closing of this transaction is subject to the satisfaction of certain closing conditions, including the resolution of title defects exceeding specified levels. There can be no assurance that this transaction will be completed in the anticipated time frame, or at all.

*Equity Compensation.* During the third quarter of 2011, we granted 266,282 PSUs and 90,665 RSUs pursuant to our long term incentive program. Please refer to *Note* 8 - *Compensation Plans* within Part I, Item 1 of this report for additional discussion.

Credit Facility. The borrowing base for our credit facility was increased to \$1.4 billion from \$1.3 billion during the third quarter of 2011. The current commitment amount remains at \$1.0 billion. Please refer to Overview of Liquidity and Capital Resources below for additional discussion.

#### First Nine Months 2011 Highlights

Production Results. The table below provides a regional breakdown of our first nine months of 2011 production:

	<b>Mid-Continent</b>	ArkLaTex	South Texas & Gulf Coast	Permian	Rocky Mountain	Total (1)
First Nine Months of 2011 Production:						
Oil (MBbl)	246.2	46.2	1,783.6	1,000.7	2,542.0	5,618.8
Gas (MMcf)	22,026.5	20,605.5	23,120.5	2,720.5	3,041.9	71,514.8
NGLs (MBbl)	57.5	61.3	2,045.9	8.9	22.6	2,196.3
Equivalent (MMCFE)	23,848.8	21,250.5	46,097.9	8,778.4	18,429.3	118,404.8
Avg. Daily Equivalents (MMCFE/d)	87.4	77.8	168.9	32.2	67.5	433.7
Relative percentage	20%	18%	39%	7%	16%	100%

<sup>(1)</sup> Totals may not add due to rounding.

For the first nine months of 2011, our production was led by our South Texas & Gulf Coast region due to the ongoing drilling activities in our Eagle Ford shale program. Please refer to Comparison of Financial Results and Trends Between the Nine Months Ended September 30, 2011, and 2010 for additional discussion on production.

Costs Incurred. The following table sets forth the costs incurred for our oil and gas activities for the first nine months of 2011:

		e Months Ended ber 30, 2011
	(in tl	iousands)
Development costs	\$	815,684
Facility costs		86,893
Exploration costs		133,472
Acquisitions of unproved properties		47,081
Total, including asset retirement obligations	\$	1,083,130

Our capital and exploration activities reflect higher cash flows provided by operating activities, divestiture proceeds, and proceeds from the issuance of our 6.625% Senior Notes.

Rocky Mountain Divestiture. In January 2011, we received cash, before marketing costs and Net Profits Plan payments, of \$45.5 million from the completed sale of certain non-strategic assets located in our Rocky Mountain region. The final gain on this divestiture was approximately \$27.2 million.

6.625% Senior Notes. In the first quarter of 2011, we issued \$350.0 million in aggregate principal amount of 6.625% Senior Notes. These notes were issued at par value and have a maturity date of February 15, 2019. Net proceeds from the issued notes were approximately \$341.1 million. We used a portion of the proceeds to repay the outstanding balance under our previous credit facility. Remaining proceeds were used to fund our ongoing capital expenditure program and for general corporate purposes.

Credit Facility. We completed a \$2.5 billion Fourth Amended and Restated Credit Agreement on May 27, 2011. The initial borrowing base for the facility was set at \$1.3 billion and was increased to \$1.4 billion during the third quarter of 2011. The initial commitment amount was \$1.0 billion. Please refer to Overview of Liquidity and Capital Resources below for additional discussion.

*Mid-Continent Divestiture.* In June 2011, we completed the divestiture of certain non-strategic Constitution Field assets located in our Mid-Continent region. Total cash received, before marketing costs and Net Profits Plan payments, was approximately \$35.7 million. The final sales price is subject to post-closing adjustments and is expected to be finalized during the fourth quarter of 2011. The estimated gain on this divestiture is approximately \$28.4 million.

Acquisition and Development Agreement. The Acquisition and Development Agreement between us and Mitsui E&P Texas LP calls for the transfer of a12.5 percent working interest in certain non-operated oil and gas assets representing approximately 39,000 net acres in Dimmit, LaSalle, Maverick and Webb Counties, Texas. If consummated, the agreement also provides for the conveyance of one-half of the Company's ownership in related gathering assets for reimbursement by Mitsui of50 percent of costs incurred on those assets and paid by the Company through the closing date. The effective date of the transfer would be March 1, 2011. As consideration for the interests, Mitsui has agreed to pay, or carry, 90 percent of certain drilling and completion costs attributable to our remaining interests in these assets following the closing of the transaction, until Mitsui has expended an aggregate \$680.0 million on our behalf. We estimate it will take three to four years to fully utilize the carry, based on our forecast of the operator's drilling plans. Mitsui would also reimburse us for capital expenditures and other costs, net of revenues, that we paid and attributable to the transferred interests during the period between March 1, 2011 and the closing date. We would apply these reimbursed costs to the remaining ten percent of our drilling and completion costs for the affected acreage. The transaction was expected to close in the thrid quarter of 2011, subject to the satisfaction of closing conditions. Subsequent to September 30, 2011, we and Mitsui mutually agreed to extend the outside date for closing to December 23, 2011 to allow the parties to continue efforts to satisfy outstanding closing conditions, including obtaining required consents. There can be no assurance that this transaction will be completed in the anticipated time frame, or at all.

#### Outlook for the Remainder of 2011 and 2012

We began 2011 operating two rigs on our Eagle Ford shale acreage with plans to increase our operated drilling rig count to five or six by year end. We believe we have secured the drilling rigs and completion services necessary to execute our development program in the Eagle Ford shale into the future. We believe our water rights in the Rio Grande River will meet our planned drilling and completion needs, and we are currently completing our wells with water from the Rio Grande River. Currently we are running four operated rigs on our Eagle Ford shale acreage. By the end of the first quarter of 2012, we expect to take delivery of two more walking rigs that will focus on pad drilling, which we expect these rigs to enhance operational efficiencies in our program with reduced time from spud to production and reduced well costs. Along with our pad drilling tests, we have started down spacing pilots to test approximately 625 foot spacing from the current 1,250 foot spacing. During the third quarter of 2011, additional wet gas takeaway capacity from the Eagle Ford Gathering, LLC pipeline system became available and we began transporting gas on that system in the third quarter. With regard to oil and condensate take-away capacity, we have commissioned an in-field pipeline to transport oil and condensate at two take away points at the edge of our elasehold. This line will allow for more efficient trucking of our oil and condensate. The operator of our outside-operated Eagle Ford shale properties ran an average of ten drilling rigs in the third quarter of 2011. We anticipate they will operate ten to twelve rigs on these assets in the fourth quarter of 2011 and through the end of 2012.

We expect to operate three drilling rigs for the remainder of 2011 in our Bakken/Three Forks program in the Williston Basin of North Dakota. We have approximately 205,500 net acres in the Williston Basin, of which approximately 85,000 acres are in areas we are currently developing. Our drilling has focused on our Raven and Gooseneck prospects in McKenzie and Divide Counties, North Dakota, respectively. Our plans are to continue with a three to four rig program throughout 2012. As normal operating conditions have returned following flooding in the region, we have been able to complete a significant number of wells and restore efforts to meet our original drilling and completion plan. Elsewhere in the Rocky Mountain region, we have drilled and completed all five planned exploration wells in the DJ Basin of southeastern Wyoming. We have since dropped that rig and picked up a new rig for the Powder River Basin in Wyoming, where it will be used to drill several exploratory wells targeting the Niobrara formation in that area.

In our ArkLaTex region, we plan to continue to drill wells in our operated Haynesville shale program, where we anticipate a one rig program through the third quarter of 2012. This program will focus on drilling the remaining six wells required to have all of our acreage held by production. Once we have all of our operated Haynesville acreage held by production, we plan to cease our drilling operations in this area until higher natural gas prices justify resuming activity.

We plan to run two operated drilling rigs targeting the Granite Wash formation in our Mid-Continent region for the remainder of the year. As our acreage in this play is held by production, we can adjust our activity levels quickly as circumstances warrant.

In our Permian Basin region, we plan to focus on drilling Mississippian wells and testing several exploration concepts.

Please refer to Overview of Liquidity and Capital Resources for additional discussion regarding how we anticipate funding our 2011 capital programs.

### Financial Results of Operations and Additional Comparative Data

The table below provides information regarding selected production and financial information for the quarter endedSeptember 30, 2011, and the immediately preceding three quarters. Additional details of per MCFE costs are presented later in this section.

		For the Three Months Ended										
	Sej	September 30, 2011		June 30, 2011	March 31, 2011			December 31, 2010				
			(\$	in millions, excep	ot for production data)							
Production (BCFE)		42.5		39.8		36.1		31.6				
Oil, gas, and NGL production revenue	\$	325.2	\$	333.9	\$	276.3	\$	250.1				
Realized hedge (loss) gain	\$	(6.8)	\$	(6.3)	\$	(1.4)	\$	2.8				
Gain on divestiture activity	\$	190.7	\$	30.0	\$	24.9	\$	23.1				
Lease operating expense	\$	40.0	\$	33.2	\$	33.1	\$	33.5				
Transportation costs	\$	23.9	\$	16.9	\$	15.0	\$	7.1				
Production taxes	\$	13.8	\$	3.3	\$	17.8	\$	16.4				
DD&A	\$	123.1	\$	115.4	\$	105.4	\$	94.7				
Exploration	\$	11.3	\$	9.6	\$	12.7	\$	21.1				
General and administrative	\$	29.8	\$	27.3	\$	25.9	\$	31.6				
Change in Net Profits Plan liability	\$	(24.9)	\$	(14.0)	\$	14.2	\$	(4.6)				
Unrealized and realized derivative (gain) loss	\$	(128.4)	\$	(43.9)	\$	88.4	\$	13.0				
Net income (loss)	\$	230.1	\$	124.5	\$	(18.5)	\$	37.0				

Note: Prior to 2011, we have reported our natural gas production as a single stream of rich gas measured at the well head. Beginning in the first quarter of 2011, we changed our reporting for natural gas volumes to show natural gas and NGL production volumes consistent with title transfer for each product. Please refer to additional discussion above under the caption *Oil, Gas, and NGL Prices.* 

## Table of Contents

Note: Prior period NGL production volumes, revenues, and prices have not been reclassified to conform to the current presentation given the immateriality of NGL volumes in prior periods. Please refer to additional discussion above under the caption *Oil, Gas, and NGL Prices*.

We present per MCFE information because we use this information to evaluate our performance relative to our peers and to identify and measure trends that we believe require analysis. Average daily reported production for the first nine months of 2011 increased 51 percent compared with the same period in 2010, driven primarily by the development of our Eagle Ford shale program.

Changes in production volumes, oil, gas, and NGL production revenues, and costs reflect the cyclical and highly volatile nature of our industry. Our realized price on a per MCFE basis increased six percent for both the three months and nine months endedSeptember 30, 2011, compared to the same periods in 2010. The majority of the increase is due to a higher realized price received for oil. Please refer to discussion above under *Oil, Gas, and NGL Prices* for information regarding how we have changed our reporting for natural gas volumes to show post processing production volumes of natural gas and NGLs for assets where our sales contracts permit us to do so.

Our LOE on a per MCFE basis for the three and nine months endedSeptember 30, 2011, decreased 11 percent and 20 percent, respectively, compared to the same periods in 2010. The divestiture of non-strategic properties within our Rocky Mountain and Mid-Continent regions in 2011 and Permian region in late 2010 with meaningfully higher per unit operating costs is a driver of the decline in LOE from 2010. In addition, our LOE declined on a per MCFE basis due to higher production volumes.

Production taxes on a per MCFE basis for the three and nine months endedSeptember 30, 2011, decreased 15 percent and 37 percent, respectively, compared to the same periods in 2010. We received notification in the second quarter that wells within our Eagle Ford and Haynesville shale plays qualified for the severance tax incentive programs in Texas. As a result a sizable incentive tax rebate was recorded during the second quarter, causing a significant decrease for the nine months ended September 30, 2011. Production taxes for the three months ended September 30, 2011, decreased due to lower anticipated severance tax accruals as a result of the reduced tax rates. We expect that substantially all future operated wells to be drilled in these areas will qualify for enacted reduced tax rates. We generally expect production taxes to trend with oil, gas, and NGL revenues.

Transportation costs on a per MCFE basis for the three and nine months endedSeptember 30, 2011, increased 211 percent and 161 percent, respectively, compared to the same periods in 2010. This is a result of increased production in our Eagle Ford shale program, where new transportation arrangements that we have entered into are resulting in higher per unit transportation costs, due to the lack of infrastructure in the emerging play. We anticipate transportation costs will increase over the remainder of the year on a per MCFE basis, as the Eagle Ford shale becomes a larger portion of our production mix.

Our general and administrative expense on a per MCFE basis for both the three and nine months endedSeptember 30, 2011, decreased 27 percent compared to the same periods in 2010. Production increased at a faster rate than our general and administrative expense. A portion of our general and administrative expense is linked to our profitability and cash flow, which are driven in large part by the realized commodity prices we receive for our production. The Net Profits Plan and a portion of our short-term incentive compensation are tied to net revenues and therefore are subject to variability. Our operating profit, including the effects of derivative cash settlements, for the three and nine months ended September 30, 2011, decreased one percent and increased four percent, respectively, compared to the same periods in 2010.

Our depletion, depreciation, and amortization, including asset retirement obligation accretion expense, for the three and nine months ended September 30, 2011, decreased five percent and six percent per MCFE, respectively, compared to the same periods in 2010. The property balances between the periods presented stayed relatively constant while the reserve base increased causing the per unit DD&A rate to decrease. Our DD&A rate can fluctuate as a result of impairments, divestitures, and changes in the mix of our production and the underlying proved reserve volumes. Additionally, the accounting treatment for assets that are classified as assets held for sale can also impact our DD&A rate since properties held for sale are no longer depleted.

Our basic and diluted earnings per share, for the three and nine months ended September 30, 2011, increased substantially compared to the same periods in 2010. The majority of this increase is due to our net income balance used to derive earnings per share, which includes a gain of approximately \$191.4 million related to our divestiture of our operated acreage in LaSalle County, Texas. See *Note 3 - Divestitures and Assets Held for Sale*, in Part I, Item 1 of this report. Divestitures by nature are considered non-recurring by the Company and are not indicative of future activity.

Please refer to Comparison of Financial Results and Trends Between the Three Months Ended September 30, 2011, and 2010 and Comparison of Financial Results and Trends Between the Nine Months Ended September 30, 2011, and 2010 for additional discussion on oil, gas, and NGL production expense, DD&A, and general and administrative expense.

Both basic and diluted earnings per share are presented in the table above. We use the treasury stock method to account for the potential diluted earnings per share impact of unvested RSUs, contingent PSUs, in-the-money stock options, and our 3.50% Senior Convertible Notes. In-the-money stock options, unvested RSUs, and contingent PSUs were dilutive for the three and nine months ended September 30, 2011, and 2010. Basic common shares outstanding used in our September 30, 2011, and 2010 earnings per share calculations reflect increases in outstanding shares related to stock option exercises and vested RSUs. Our September 30, 2011, and 2010, respectively, as a result of stock option exercises. The number of RSUs that vested and settled during the first nine months of 2011 and 2010 were 72,127 and 57,687, respectively. During the nine months ended September 30, 2011, our average stock price exceeded the conversion price of \$54.42 making our 3.50% Senior Convertible Notes dilutive for our 2011 quarter-to-date and year-to-date diluted weighted-average common shares outstanding calculation. The 3.50% Senior Convertible Notes were not dilutive for our 20.100. Currently, our stock price continues to trade above the \$54.42 conversion price, therefore we expect our 3.50% Senior Convertible Notes to have a dilutive for our fourth quarter earnings per share calculation. Please refer to *Note 6 - Earnings per Share* in Part I, Item 1 of this report for additional discussion.

#### Comparison of Financial Results and Trends Between the Three Months Ended September 30, 2011, and 2010

*Oil, gas, and NGL production revenue.* Average daily reported production increased 55 percent to 462.1 MMCFE for the quarter ended September 30, 2011, compared with 298.4 MMCFE for the quarter ended September 30, 2010. Please refer to the discussion above under *Oil, Gas, and NGL Prices* regarding how we have changed our reporting for natural gas and NGL volumes. The following table presents the regional changes in our production, oil, gas, and NGL revenues, and costs between the two quarters:

	Average Net Daily Production Added (Decreased) (MMCFE/d)	Oil, Gas, & NGL Reven Added (Decreased) (in millions)	ue	Production Costs Increase (Decrease) (in millions)	
Mid-Continent	(8.7)	\$	1.6	\$	_
ArkLaTex	46.3	1	8.1		2.7
South Texas & Gulf Coast	131.4	8	8.5	2	26.9
Permian	(8.2)	(	1.2)	(1	1.1)
Rocky Mountain	2.9	20	0.9		4.6
Total	163.7	\$ 12	7.9	\$ 3:	33.1

The largest increase in production occurred in the South Texas & Gulf Coast region as a result of drilling activity in our Eagle Ford shale program. Activity in our Eagle Ford shale program continues to increase and we anticipate production from this region will continue to increase for the foreseeable future. We also saw an increase in our ArkLaTex region, as a result of strong production performance from wells drilled in our Haynesville shale program in late 2010 and early 2011.

A six percent increase in the realized equivalent price per MCFE, combined with a 55 percent increase in production volumes, resulted in a substantial increase in revenue between the two periods. We expect our realized prices to trend with commodity prices.

*Realized hedge (loss) gain.* We recorded a net realized hedge loss of \$6.8 million for the three-month period ended September 30, 2011, compared with a\$8.8 million net gain for the same period in 2010. The realized net loss in 2011 is comprised of realized cash settlements on commodity derivative contracts that were previously recorded in AOCL, whereas the realized net gain in 2010 is comprised of realized cash settlements on all commodity derivative contracts. Our realized oil, gas, and NGL hedge gains and losses are a function of commodity prices at the time of settlement and the price at the time the derivative transaction was entered into.

Gain on divestiture activity. We recorded a \$190.7 million net gain on divestiture activity for the quarter endedSeptember 30, 2011, relating mainly to the divestiture of certain Eagle Ford shale oil and gas assets in our South Texas & Gulf Coast region. We recorded a \$4.2 million net gain on divestiture activity for the comparable period of 2010, related to a divestiture of non-core oil and gas properties located in our Rocky Mountain region. We are currently marketing other oil and gas properties, and we will continue to evaluate properties for divestiture in the normal course of our business.

*Marketed gas system revenue and expense.* Marketed gas system revenue increased \$6.0 million to \$21.8 million for the quarter endedSeptember 30, 2011, compared with \$15.8 million for the same period of 2010. Concurrent with the increase in marketed gas system revenue, marketed gas system expense increased \$4.4 million to \$19.1 million for the quarter ended September 30, 2011, compared with \$14.7 million for the same period of 2010. The net margin stayed relatively consistent with historical performance. We expect that marketed gas system revenue and expense will continue to coincide with increases and decreases in production and our realized price for natural gas.

*Oil, gas, and NGL production expense.* Total production costs for the third quarter of 2011 increased74 percent, to \$77.8 million compared with \$44.6 million for the same period of 2010. Total oil and gas production costs per MCFE increased \$0.20, or 12 percent, to \$1.83 for the third quarter of 2011, compared with \$1.63 for the same period in 2010. The per MCFE increase is comprised of the following:

- A \$0.38 increase in overall transportation costs on a per MCFE basis is primarily a result of increased production in our Eagle Ford shale. Please refer to our transportation cost discussion under the caption *A three-month and nine-month overview of selected production and financial information, including trends* for additional information.
- A \$0.18 decrease in recurring LOE on a per MCFE basis reflects the 2010 and early 2011 sales of non-core properties with higher per unit LOE costs.
- A \$0.06 per MCFE decrease in production taxes is due to severance tax incentives within our South Texas & Gulf Coast and ArkLaTex regions. Please refer to our production tax discussion under the caption *A three-month and nine-month overview of selected production and financial information, including trends* for additional information.
- A \$0.06 overall increase in workover LOE on a per MCFE basis relates primarily to increased workover activity in our Permian Region.

Depletion, depreciation, amortization, and asset retirement obligation liability accretion. DD&A increased \$39.3 million, or 47 percent, to\$123.1 million for the three-month period ended September 30, 2011, compared with \$83.8 million for the same period in 2010. Please refer to our depletion, depreciation, amortization, and asset retirement obligation liability accretion comparison discussion under the caption A three-month and nine-month overview of selected production and financial information, including trends for additional information.

Exploration. The components of exploration expense are summarized as follows:

		For the Three Months Ended September 30,			
	201	1		2010	
		(in m	illions)		
Geological and geophysical expenses	\$	0.2	\$		4.9
Exploratory dry hole expense		—			—
Overhead and other expenses		11.1			9.5
Total	\$	11.3	\$		14.4

The majority of the change in exploration expense between the three-month periods ended September 30, 2011, and 2010 is due to decreased geological and geophysical expense as our current plays become more established. As a result, the amount spent on seismic activity is less. We continue to test our current resource plays and expect to maintain a modest exploratory program for new assets in future periods. Any exploratory well incapable of producing oil, gas, or NGLs in commercial quantities will be deemed an exploratory dry hole, which will impact the amount of exploration expense we record. There were no exploratory wells deemed dry during the third quarters of 2011 or 2010.

General and administrative. General and administrative expense increased \$3.6 million, or 14 percent, to \$29.8 million for the three months ended September 30, 2011, compared with \$26.2 million for the same period of 2010. On a per unit basis, G&A expense decreased \$0.26 to \$0.70 per MCFE for the third quarter of 2011 compared to \$0.96 per MCFE for the same period in 2010.

The majority of the increase in general and administrative expense is due to a \$2.5 million increase in base compensation and \$400,000 increase in pension expense for the three months ended September 30, 2011, compared with the same period in 2010. The increase in base compensation and pension expense is due to an increase in employee headcount between the two periods. We ramped up our hiring efforts for operational personnel during the second half of 2010 and expect our efforts will continue into 2012.

*Change in Net Profits Plan liability.* For the quarter ended September 30, 2011, this non-cash item was a benefit of \$24.9 million compared to an expense of \$4.1 million for the same period in 2010. The expense or benefit is directly related to the change in the estimated value of the associated liability over the reporting period. Commodity prices decreased from the second quarter of 2011 to the third quarter of 2011, resulting in a non-cash benefit. Adjustments to the liability are subject to estimation and may change dramatically from period to period based on assumptions used for production rates, reserve quantities, commodity pricing, discount rates, tax rates, and production costs.

Unrealized and realized derivative (gain) loss. We recognized an unrealized and realized derivative gain of \$128.4 million for the third quarter of 2011 compared to a loss of \$5.7 million for the same period in 2010. The 2011 amount includes gains on unrealized changes in fair value on commodity derivative contracts of \$132.2 million and realized cash settlement losses on derivatives for which unrealized changes in fair value were not previously recorded in other comprehensive loss of \$3.8 million. The 2010 balance is comprised solely of the ineffective portion of derivatives designated as cash flow hedges. Please refer to *Note 10 - Derivative Financial Instruments* in Part I, Item 1 of this report for additional discussion.

Impairment of proved properties. We recognized an impairment loss of approximately \$48.5 million for the third quarter of 2011. The impaired properties are legacy assets targeting the James Lime formation in the Company's ArkLaTex region. This impairment was related to continued depressed gas prices in the region. There were no impairments of proved properties in the third quarter of 2010.

Income tax expense. We recorded expense of \$133.3 million for the third quarter of 2011 compared to expense of \$9.3 million for the third quarter of 2010 resulting in effective tax rates of 36.7 percent and 37.7 percent, respectively. The change in income tax expense is primarily the result of the differences in components of net income discussed above and the effect of recording a credit benefit in the third quarter of 2011 from completing a three year research and development tax credit study. The 2011 decrease in the effective tax rate from 2010 primarily reflects the changes in the mix of the highest marginal state tax rates, the state tax rate effect on year-to-date net income from divestiture and drilling activity in 2010, the effect related to recording research and development tax credits, and changes in the effects of other permanent differences. The current portion of our income tax expense is higher compared with the same period of 2010 as a result of the differing impacts from 2011 and 2010 non-core asset divestitures and differing impacts of each annual drilling program.

#### Comparison of Financial Results and Trends Between the Nine Months Ended September 30, 2011, and 2010

*Oil, gas, and NGL production revenue.* Average daily reported production increased 51 percent to 433.7 MMCFE for the nine months ended September 30, 2011, compared with 286.9 MMCFE for the same period in 2010. Please refer to the discussion above under *Oil, Gas, and NGL Prices* regarding how we have changed our reporting for natural gas and NGL volumes. The following table presents the regional changes in our production, oil, gas, and NGL revenues, and costs between the two periods:

	Average Net Daily Production Added (Decreased)	Oil, Gas, & NGL Revenue Added (Decreased)	Production Costs Increase (Decrease)
	(MMCFE/d)	(in millions)	(in millions)
Mid-Continent	(5.7)	\$ (0.1)	\$ (0.2)
ArkLaTex	42.1	44.8	3.7
South Texas & Gulf Coast	118.8	250.3	50.4
Permian	(7.9)	(3.8)	0.1
Rocky Mountain	(0.5)	58.2	4.8
Total	146.8	\$ 349.4	\$ 58.8

Please refer to Comparison of Financial Results and Trends Between the Three Months Ended September 30, 2011, and 2010 for additional discussion regarding the above results.

A six percent increase in realized equivalent price per MCFE, combined with a 51 percent increase in production volumes, resulted in a substantial increase in revenue.

Realized hedge (loss) gain. We recorded a net realized hedge loss of \$14.5 million for the nine-month period ended September 30, 2011, compared with a \$20.8 million gain for the same period in 2010. Please refer to Comparison of Financial Results and Trends Between the Three Months Ended September 30, 2011, and 2010 for additional discussion.

Gain on divestiture activity. We had a \$245.7 million net gain on divestiture activity for the nine months endedSeptember 30, 2011, relating mainly to the divestiture of non-strategic oil and gas properties located in our Mid-Continent, Rocky Mountain, and South Texas & Gulf Coast regions. We recorded a \$132.2 million net gain on divestiture activity for the comparable period of 2010, due primarily to the divestiture of non-strategic oil and gas properties located in our Rocky Mountain region.

Marketed gas system revenue and expense. Marketed gas system revenue increased \$2.3 million, or four percent, to \$56.3 million for the nine months ended September 30, 2011, compared with \$54.0 million for the comparable period of 2010. Marketed gas system expense decreased \$1.0 million, or two percent, to \$51.6 million for the nine months ended September 30, 2011, compared with \$52.6 million for the comparable period of 2010.

*Oil, gas, and NGL production expense.* Total production costs for the first nine months of 2011 increased 43 percent to\$196.9 million compared with \$138.1 million for the same period of 2010. Total oil and gas production costs per MCFE decreased \$0.10 to \$1.66 for the first nine months of 2011, compared with \$1.76 for the same period in 2010. The per MCFE decrease is comprised of the following:

- a \$0.29 increase in overall transportation costs per MCFE;
- a \$0.25 decrease in recurring LOE per MCFE;
- a \$0.17 decrease in production taxes per MCFE; and
- a \$0.03 increase in workover LOE per MCFE.

Please refer to Comparison of Financial Results and Trends Between the Three Months Ended September 30, 2011, and 2010 for additional discussion related to production expense.

Depletion, depreciation, amortization, and asset retirement obligation liability accretion. DD&A increased \$102.5 million, or 42 percent, to \$343.8 million for the nine-month period ended September 30, 2011, compared with \$241.3 million for the same

period in 2010. Please refer to our depletion, depreciation, amortization, and asset retirement obligation liability accretion comparison discussion under the caption A threemonth and nine-month overview of selected production and financial information, including trends for additional information.

Exploration. The components of exploration expense are summarized as follows:

	For the Nine Months Ended September 30,				
	2011			2010	
		(in m	illions)		
Geological and geophysical expenses	\$	2.3	\$		13.7
Exploratory dry hole expense		—			0.3
Overhead and other expenses		31.3			28.8
Total	\$	33.6	\$		42.8

Please refer to Comparison of Financial Results and Trends Between the Three Months Ended September 30, 2011, and 2010, in the above section for additional discussion.

*General and administrative.* General and administrative expense increased \$7.9 million, or ten percent, to\$83.0 million for the nine months ended September 30, 2011, compared with \$75.1 million for the same period of 2010. On a per unit basis, G&A expense decreased \$0.26 to \$0.70 per MCFE for the first nine months of 2011 compared to \$0.96 per MCFE for the same nine-month period in 2010.

General and administrative expense increased due to a \$5.3 million increase in base compensation, accruals for cash bonus, and equity compensation expense along with a \$3.9 million increase in corporate office expenses for the nine months ended September 30, 2011, compared with the same period in 2010. The increase in base compensation and corporate office expenses are due to an increase in employee headcount between the two periods. We ramped up our hiring efforts for operational personnel during the second half of 2010. G&A expense decreased \$1.4 million for the nine months ended September 30, 2011, primarily due to a decrease in Net Profits Plan payments as a result of the Permian divestiture that was completed in late 2010.

*Change in Net Profits Plan liability.* This non-cash charge is directly related to the change in the estimated value of the associated liability between the reporting periods. For the nine months ended September 30, 2011, this non-cash item was a benefit of \$24.7 million compared to a benefit of \$29.8 million for the same period in 2010. The change between the two periods is due to decreases in commodity prices, which we broadly expect the change in this liability to trend with. Adjustments to the liability are subject to estimation and may change dramatically from period to period based on assumptions used for production rates, reserve quantities, commodity pricing, discount rates, tax rates, and production costs.

Unrealized and realized derivative (gain) loss. We recognized an unrealized and realized derivative gain of \$83.9 million for the first nine months of 2011 compared to a gain of \$4.1 million for the same period in 2010. The 2011 amount includes gains on unrealized changes in fair value on commodity derivative contracts of \$108.0 million and realized cash settlement losses on derivatives for which unrealized changes in fair value were not previously recorded in other comprehensive loss of \$24.1 million. The 2010 balance is comprised solely of the ineffective portion of derivatives designated as cash flow hedges. *Please refer to Note 10 - Derivative Financial Instruments* in Part I, Item 1 of this report.

Impairment of proved properties. We recognized an impairment loss of \$48.5 million for the first nine months of 2011. The impaired properties are legacy assets in the Company's ArkLaTex region. This impairment was related to continued depressed gas prices in the region. There were no impairments of proved properties in the third quarter of 2010.

Income tax expense. Income tax expense totaled \$195.1 million for the nine-month period ended September 30, 2011, compared to an income tax expense of \$96.7 million for the same period in 2010, resulting in effective tax rates of 36.7 percent and 37.7 percent, respectively. The change in income tax expense is the result of the differences in components of net income and recording research and development tax credits. The 2011 decrease in effective tax rate from 2010 is primarily the result of recording a credit benefit from completing a three year research and development tax credit study, a change in North Dakota's corporate tax rate during 2011, and to a lesser extent the impact of other permanent differences including the domestic production activities deduction partially offset by an increase related to the mix of the highest marginal state tax rates resulting from divestiture and drilling activity in 2010. The current portion of our tax expense is greater in 2011 compared to 2010 due to differing impact between years of our drilling program, operating income from our oil and gas properties and non-core asset divestitures.

#### **Overview of Liquidity and Capital Resources**

We believe that we have sufficient liquidity and capital resources to execute our business plans for the foreseeable future.

#### Sources of Cash

For the remainder of 2011, we anticipate that cash flow from operations, expected divestiture proceeds, and/or joint venture activity will fund the majority of our capital program. Our credit facility, which was undrawn as of quarter end, will be used to fund any remaining balance of our capital program. Although we anticipate that our cash flow and borrowing capacity under our credit facility will be more than sufficient to fund our current capital program, accessing the capital markets or using other financing alternatives is an option if deemed the best solution for our demands. We will continue to evaluate our property base to identify and divest properties we consider non-core to our strategic goals.

Our primary sources of liquidity are cash flows provided by operating activities, use of our credit facility, divestitures of properties, and other financing alternatives, including accessing the debt and equity markets. From time to time, we may be able to enter into carrying cost funding and sharing arrangements with third parties for particular exploration and/or development programs. All of our sources of liquidity can be impacted by the general condition of the broad economy and by significant fluctuations in oil, gas, and NGL prices, operating costs, and volumes produced, all of which affect us and our industry. We have no control over the market prices for oil, gas, or NGLs, although we are able to influence the amount of our net realized revenues related to our oil, gas, and NGL sales through the use of derivative contracts as part of our commodity price risk management program. The borrowing base on our credit facility could be reduced due to lower commodity prices or any divestiture by us of a significant amount of producing properties. Historically, decreases in commodity prices have limited our industry's access to the capital markets. In the first quarter of 2011, we issued \$350.0 million in aggregate principal amount of 6.625% Senior Notes at par. During the second quarter of 2011, we amended and restated our credit facility with a \$2.5 billion maximum loan amount, \$1.0 billion in current lender commitments, and a borrowing base of \$1.3 billion, which was increased to \$1.4 billion in the third quarter of 2011. We also entered into an Acquisition and Development Agreement that would fund, or carry, 90 percent of our costs for the drilling and completion of certain wells in our outside operated Eagle Ford position until \$680.0 million has been expended on our behalf. The closing of this transaction is now anticipated to occur in the fourth quarter of 2011, and remains subject to the satisfaction of closing conditions, including the receipt of certain consents. There can be no assurance that this tra

#### Current Credit Facility

In May 2011, we completed our Fourth Amended and Restated Credit Agreement with a\$2.5 billion senior secured revolving credit facility with a scheduled maturity date of May 27, 2016. This credit facility replaced our prior \$1.0 billion senior secured revolving credit facility. The initial borrowing base for the new credit facility was \$1.3 billion, which was increased to \$1.4 billion in the third quarter of 2011. Our lenders have agreed to a current aggregate commitment amount of \$1.0 billion. The borrowing base is redetermined semi-annually by our lenders. We believe that the current commitment amount is sufficient to meet our current liquidity and operating needs. To date, we have experienced no issues drawing upon our credit facility. No individual bank participating in the credit facility represents more than ten percent of the lending commitments under the credit facility.

We had no borrowings outstanding under our credit facility as of September 30, 2011. We had two letters of credit outstanding under our credit facility for a total amount of \$608,000 as of September 30, 2011. Letters of credit reduce the amount available under the credit facility on a dollar-for-dollar basis. We had \$999.4 million of available borrowing capacity under this facility as of September 30, 2011. Our daily weighted-average credit facility debt balance was zero for the three months ended September 30, 2011. Our daily debt balance was \$5.4 million for the nine months ended September 30, 2011, and \$6.8 million and \$43.9 million for the three months and nine months ended September 30, 2010, respectively.

Please refer to Note 5 - Long-Term Debt in Part I, Item 1 of this report, for further discussion on our credit facility.

#### Weighted-Average Interest Rates

Our weighted-average interest rates in the current and prior year include cash interest payments, cash fees paid on the unused portion of the credit facility's aggregate commitment amount, letters of credit fees, amortization of the 3.50% Senior Convertible Notes debt discount, and amortization of deferred financing costs. Our weighted-average interest rates for the three months ended September 30, 2011, and 2010 were 7.9 percent and 9.2 percent, respectively, and 9.0 percent and 8.4 percent for the nine months ended September 30, 2011, and 2010, respectively. The decrease in the weighted-average interest rates for the three months ended September 30, 2011, is a result of commitment fees increasing at a slower rate than the weighted-average debt balance during that

#### Table of Contents

period. The increase in our weighted-average interest rate for the nine months ended September 30, 2011, is the result of commitment fees increasing at a faster rate than the average outstanding debt balance.

We are subject to customary covenants under our credit facility, including limitations on dividend payments and requirements to maintain certain financial ratios, which include debt to earnings before interest, taxes, depreciation, depletion, amortization, and exploration expense of less than 4.0 to 1.0 and a current ratio, as defined by our credit agreement, of not less than 1.0. As of September 30, 2011, our debt to EBITDAX ratio and current ratio as defined by our credit agreement, were 0.79 and 3.10 respectively. As of the filing of this report, we are in compliance with all financial and non-financial covenants under our credit facility.

#### Uses of Cash

We use cash for the acquisition, exploration, and development of oil and gas properties, and for the payment of debt obligations, trade payables, overhead, income taxes, and stockholder dividends. Expenditures for the exploration and development of oil and gas properties are the primary use of our capital resources. In the first nine months of 2011, we spent \$1.1 billion for exploration and development capital expenditures. These amounts differ from our costs incurred amounts based on the timing of cash payments associated with these activities as compared to the accrual based activity upon which costs incurred amounts are presented. These cash outflows were funded using cash inflows from operations, proceeds from the sale of assets, and proceeds from our 6.625% Senior Notes.

The amount and allocation of future capital expenditures will depend upon a number of factors including the number and size of available economic acquisitions and drilling opportunities, our cash flows from operating, investing, and financing activities, and our ability to assimilate acquisitions and execute our drilling programs. In addition, the impact of oil, natural gas, and NGL prices on investment opportunities, the availability of capital and borrowing facilities, and the success of our development and exploratory activities may lead to changes in funding requirements for future development. We regularly review our capital expenditure budget to assess changes in current and projected cash flows, acquisition opportunities, debt requirements, and other factors.

As of the filing of this report, we have Board authorization to repurchase up to 3,072,184 shares of our common stock under our stock repurchase program. Shares may be repurchased from time to time in open market transactions or privately negotiated transactions subject to market conditions and other factors, including certain provisions of our credit facility and the indenture governing our 6.625% Senior Notes, compliance with securities laws, and the terms and provisions of our stock repurchase program. There have been no share repurchases to date in 2011, and we do not plan to repurchase shares for the remainder of 2011.

We have no debt maturities until April 1, 2012, when all or a portion of our outstanding 3.50% Senior Convertible Notes can be put to us. If the notes are put to us on that date, we have the option of paying the purchase price in cash, shares of our common stock, or any combination thereof. On or after April 6, 2012, we have the option of redeeming all or a portion of the outstanding notes for cash. The notes are convertible into shares of our common stock under certain circumstances, including if they are called for redemption, and we may elect to settle conversion obligations in cash, shares of our common stock, or a combination thereof. The closing price of our common stock exceeded the conversion trigger price of \$70.75 per share for at least 20 trading days in the 30 consecutive trading days ending on the last trading day for the quarter ended March 31, 2011; however, none of the holders opted to convert their 3.50% Senior Convertible Notes during the second quarter of 2011. The closing price of our common stock did not exceed the conversion trigger price for the quarters ended June 30, 2011, and September 30, 2011; therefore, the 3.50% Senior Convertible Notes were not, and are not eligible to be converted during the third and fourth quarters of 2011.

Current proposals to fund the federal government budget include eliminating or reducing current tax deductions for intangible drilling costs, the domestic production activities deduction, and percentage depletion. Legislation modifying or eliminating these deductions would have the immediate effect of reducing operating cash flows thereby reducing funding available for our exploration and development capital programs and those of our peers in the industry. These funding reductions could have a significant adverse effect on drilling and production in the United States for a number of years.

The following table presents changes in cash flows between the nine-month periods endedSeptember 30, 2011, and 2010. The analysis following the table should be read in conjunction with our condensed consolidated statements of cash flows in Part I, Item 1 of this report.

	For t	For the Nine Months Ended September 30,				Percent	
		2011		2010	Change	Change	
		(in tho	usands)				
Net cash provided by operating activities	\$	489,747	\$	418,360	\$ 71,387	17 %	
Net cash (used in) investing activities	\$	(756,904)	\$	(236,360)	\$ (520,544)	220 %	
Net cash provided by (used in) financing activities	\$	292,003	\$	(185,560)	\$ 477,563	(257)%	

#### Analysis of Cash Flow Changes Between the Nine Months Ended September 30, 2011, and 2010

*Operating activities.* Cash received from oil and gas production revenue, including the effects of derivative cash settlements, increased \$269.4 million to \$872.3 million for the first nine months of 2011, compared with \$602.9 million for the same period in 2010. Cash paid for lease operating expenses increased \$22.1 million to \$111.0 million for the first nine months of 2011, compared with \$88.9 million for the same period in 2010.

*Investing activities.* Cash outflows for capital expenditures increased by \$592.9 million for the nine months ended September 30, 2011, compared with the same period in 2010. This increase in capital and exploration activities reflects higher cash flows available to us for investment provided by operating activities, divestiture proceeds, and proceeds from the issuance of our 6.625% Senior Notes. Net proceeds from the sale of oil and gas properties increased \$65.6 million between the two periods due to an increase in the size of the divestiture packages.

*Financing activities.* We received net proceeds of \$341.1 million from the issuance of our 6.625% Senior Notes. We incurred \$8.7 million of debt issuance costs related to our amended credit facility in 2011. Net repayments on our credit facility decreased by \$138.0 million for the nine months ended September 30, 2011, compared with the same period in 2010. As of September 30, 2011, we had no outstanding borrowings under the credit facility.

#### Commodity Price Risk and Interest Rate Risk

We are exposed to market risk, including the effects of changes in oil, gas, and NGL commodity prices and changes in interest rates as discussed below under the caption *Summary of Interest Rate Risk*. Changes in interest rates can affect the amount of interest we earn on our cash and cash equivalents and the amount of interest we pay on borrowings under our revolving credit facility. Changes in interest rates do not affect the amount of interest we pay on our fixed-rate 3.50% Senior Convertible Notes or our 6.625% Senior Notes, but do affect their fair market value.

There has been no material change to the natural gas and crude oil price sensitivity analysis previously disclosed. Refer to the corresponding section under Part II, Item 7 of our 2010 Form 10-K.

#### Summary of Oil, Gas, and NGL Derivative Contracts in Place

Our oil, gas, and NGL derivative contracts include costless swaps and costless collar arrangements. All contracts are entered into for other-than-trading purposes. Please refer to *Note 10 - Derivative Financial Instruments* in Part I, Item 1 of this report for additional information regarding accounting for our derivative transactions.

As of September 30, 2011, and as of the filing of this report, we have derivative positions in place covering a portion of anticipated production through the second quarter of 2014 totaling approximately 9 MMBbls of oil, 63 million MMBtu of natural gas, and 2 MMBbls of NGLs.

In a typical commodity swap agreement, if the agreed upon published third-party index price is lower than the swap fixed price, we receive the difference between the index price and the agreed upon swap fixed price. If the index price is higher than the swap fixed price, we pay the difference. For collar agreements, we receive the difference between an agreed upon index and the floor price if the index price is below the floor price. We pay the difference between the agreed upon ceiling price and the index price if the index price is below the floor price. We pay the difference between the agreed upon ceiling price and the index price if the index price is between the floor and ceiling prices.

#### Table of Contents

The following tables describe the volumes, average contract prices, and fair values of contracts we have in place as of September 30, 2011.

Oil Contracts

#### Oil Swaps

Contract Period	NYMEX WTI Volumes	 Weighted-Average Contract Price	 Fair Value at September 30, 2011 Asset (Liability)
	(Bbls)	(per Bbl)	(in thousands)
Fourth quarter 2011	377,500	\$ 76.79	\$ (952)
2012	2,204,000	\$ 84.89	8,634
2013	616,200	\$ 88.22	2,925
2014	660,600	\$ 91.72	4,382
All oil swaps	3,858,300		\$ 14,989

#### Oil Collars

Contract Period	NYMEX WTI Volumes		Weighted- Average Floor Price	Weighted- Average Ceiling Price	Fair Value at September 30, 2011 Asset (Liability)
	(Bbls)		(per Bbl)	(per Bbl)	 (in thousands)
Fourth quarter 2011	514,850	\$	61.86	\$ 81.73	\$ (4,087)
2012	1,434,600	\$	76.49	\$ 109.79	9,094
2013	2,146,500	\$	75.84	\$ 109.81	10,020
2014	560,200	\$	80.00	\$ 116.05	3,981
All oil collars	4,656,150	_			\$ 19,008

#### Natural Gas Contracts

#### Natural Gas Swaps

Contract Period	Volumes	Weighted-Average Contract Price	_	Fair Value at September 30, 2011 Asset
	(MMBtu)	 (per MMBtu)		(in thousands)
Fourth quarter 2011	4,730,000	\$ 5.88	\$	10,312
2012	27,600,000	\$ 5.01		25,396
2013	13,810,000	\$ 5.05		5,650
2014	2,910,000	\$ 5.42		1,021
All natural gas swaps*	49,050,000		\$	42,379

\*Natural gas swaps are comprised of IF ANR OK (1%), IF CIG (3%), IF El Paso Permian (2%), IF HSC (9%), IF NGPL MidCont. (2%), IF NGPL TXOK (5%), IF NNG Ventura (2%), IF PEPL (18%), IF Reliant N/S (33%), IF TETCO STX (24%), and NYMEX Henry Hub (1%).

#### Table of Contents

#### Natural Gas Collars

Contract Period	Volumes	Weighted- Average Floor Price	Weighted- Average Ceiling Price	_	Fair Value at September 30, 2011 Asset (Liability)
	(MMBtu)	(per MMBtu)	(per MMBtu)		(in thousands)
Fourth quarter 2011	1,660,000	\$ 5.25	\$ 6.49	\$	2,618
2012		\$ _	\$ 		_
2013	6,650,000	\$ 4.39	\$ 5.34		571
2014	5,734,000	\$ 4.38	\$ 5.36		(568)
All gas collars*	14,044,000			\$	2,621

\*Natural gas collars are comprised of IF CIG (3%), IF HSC (16%), IF NGPL TXCO (16%), IF Reliant N/S (26%), IF TETCO STX (31%), IF PEPL (8%), and NYMEX Henry Hub (<1%).

#### Natural Gas Liquid Contracts

#### NGL Swaps

Contract Period	Volumes	Weighted-Average Contract Price	Fair Value at September 30, 2011 (Liability)
	(approx. Bbls)	 (per Bbl)	(in thousands)
Fourth quarter 2011	398,000	\$ 44.74	\$ (4,590)
2012	1,217,000	\$ 46.73	(3,590)
2013	84,000	\$ 44.95	(518)
All NGL swaps*	1,699,000		\$ (8,698)

\*NGL swaps are comprised of OPIS Mont. Belvieu LDH Propane (30%), OPIS Mont. Belvieu Purity Ethane (42%), OPIS Mont. Belvieu NON-LDH Isobutane (6%), OPIS Mont. Belvieu NON-LDH Natural Gasoline (11%), and OPIS Mont. Belvieu NON-LDH Normal Butane (11%).

Refer to Note 10 - Derivative Financial Instruments in Part I, Item 1 of this report for additional information regarding our oil, gas, and NGL derivative contracts.

#### Summary of Interest Rate Risk

Market risk is estimated as the potential change in fair value resulting from an immediate hypothetical one percentage point parallel shift in the yield curve. For fixedrate debt, interest changes affect the fair market value but do not impact results of operations or cash flows. Conversely, interest rate changes for floating-rate debt generally do not affect the fair market value but do impact future results of operations and cash flows, assuming other factors are held constant. The carrying amount of our floating-rate debt typically approximates its fair value. As of September 30, 2011, we had no floating-rate debt outstanding, and our fixed-rate debt outstanding, net of debt discount, was \$632.6 million.

#### Contractual Obligations

Please see Note 7 - Commitments and Contingencies under Part I, Item 1 of this report for information pertaining to our contractual obligations.

#### **Off-Balance Sheet Arrangements**

As part of our ongoing business, we have not participated in transactions that generate relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance entities or special purpose entities ("SPE"), which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. As of September 30, 2011, we have not been involved in any unconsolidated SPE transactions.

We evaluate our transactions to determine if any variable interest entities exist. If we determine that we are the primary beneficiary of a variable interest entity, that entity is consolidated into our consolidated financial statements.

#### **Critical Accounting Policies and Estimates**

We refer you to the corresponding section in Part II, Item 7 of our 2010 Form 10-K and to the footnote disclosures included in Part I, Item 1 of this report.

#### **New Accounting Pronouncements**

Please refer to Note 2 - Basis of Presentation, Significant Accounting Policies, and Recently Issued Accounting Standards under Part I, Item 1 of this report for new accounting matters.

#### Environmental

The Company's compliance with applicable environmental laws and regulations has to date not resulted in significant capital expenditures or material adverse effects on our liquidity or results of operations. We believe we are in substantial compliance with environmental laws and regulations and do not currently anticipate that material future expenditures will be required under the existing regulatory framework. However, environmental laws and regulations are subject to frequent changes and we are unable to predict the impact that compliance with future laws or regulations, such as those currently being considered as discussed below, may have on future capital expenditures, liquidity, and results of operations.

Hydraulic fracturing. Hydraulic fracturing is an important and common practice that is used to stimulate production of hydrocarbons, particularly natural gas and NGLs, from tight formations. For additional information about hydraulic fracturing and related environmental matters, see "Risk Factors - Risks Related to Our Business - Proposed federal and state legislation and regulatory initiatives relating to hydraulic fracturing could result in increased costs and additional operating restrictions or delays" in our 2010 Form 10-K and Part II, Item 1A of this report.

*Climate Change.* In December 2009, the U.S. Environmental Protection Agency (the "EPA") determined that emissions of carbon dioxide, methane and other "greenhouse gases" present an endangerment to public health and the environment because emissions of such gases are, according to the EPA, contributing to warming of the Earth's atmosphere and other climatic changes. Based on these findings, the EPA has begun adopting and implementing regulations to restrict emissions of greenhouse gases under existing provisions of the Clean Air Act ("CAA"). The EPA recently adopted two sets of rules regulating greenhouse gase emissions under the CAA, one of which requires a reduction in emissions of greenhouse gases from motor vehicles and the other of which regulates emissions of greenhouse gase from certain large stationary sources, effective January 2, 2011. The EPA has also adopted rules requiring the reporting of greenhouse gas emissions for specified large greenhouse gas emission sources in the United States, including petroleum refineries, on an annual basis, beginning in 2011 for emissions occurring after January 1, 2010, as well as certain onshore oil and natural gas production facilities, on an annual basis, beginning in 2012 for emissions occurring in 2011. In addition, on July 28, 2011 the EPA proposed new rules that would establish new air emission controls for oil and natural gas production and natural gas processing operations.

In addition, the United States Congress has from time to time considered adopting legislation to reduce emissions of greenhouse gases and many states have already taken measures to reduce emissions of greenhouse gases primarily through the planned development of greenhouse gas emission inventories and/or regional greenhouse gas cap and trade programs. Most of these cap and trade programs work by requiring major sources of emissions, such as electric power plants, or major producers of fuels, such as refineries and gas processing plants, to acquire and surrender emission allowances. The number of allowances available for purchase is reduced each year in an effort to achieve the overall greenhouse gas emission reduction goal.

The adoption of legislation or regulatory programs to reduce emissions of greenhouse gases could require us to incur increased operating costs, such as costs to purchase and operate emissions control systems, to acquire emissions allowances or comply with new regulatory or reporting requirements. Any such legislation or regulatory programs could also increase the cost of consuming, and thereby reduce demand for, the oil and natural gas we produce. Consequently, legislation and regulatory programs to reduce emissions of greenhouse gases could have an adverse effect on our business, financial condition and results of operations. Finally, it should be noted that some scientists have concluded that increasing concentrations of greenhouse gases in the Earth's atmosphere may produce climate changes that have significant physical effects, such as increased frequency and severity of storms, droughts, and floods and other climatic events. If any such effects were to occur, they could have an adverse effect on our financial condition and results of operations.

In terms of opportunities, the regulation of greenhouse gas emissions and the introduction of alternative incentives, such as enhanced oil recovery, carbon sequestration and low carbon fuel standards, could benefit us in a variety of ways. For example, although climate change legislation could reduce the overall demand for the oil and natural gas that we produce, the relative demand for natural gas may increase since the burning of natural gas produces lower levels of emissions than other readily available fossil fuels such as oil and coal. In addition, if renewable resources, such as wind or solar power become more prevalent, natural gas-fired electric plants may provide an alternative backup to maintain consistent electricity supply. Also, if states adopt low-carbon fuel standards, natural gas may become a more attractive transportation fuel. For the nine-month periods ended September 30, 2011, and 2010, approximately 72 percent and 65 percent, respectively, of our production was natural gas and NGLs on an MCFE basis. Marketbased incentives for the capture and storage of carbon dioxide in underground reservoirs, particularly in oil and natural gas reservoirs, could also benefit us through the potential to obtain greenhouse gas emission allowances or offsets from or government incentives for the sequestration of carbon dioxide.

#### **Cautionary Information about Forward-Looking Statements**

This Quarterly Report on Form 10-Q contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. All statements, other than statements of historical facts, included in this Form 10-Q that address activities, events, or developments with respect to our financial condition, results of operations, or economic performance that we expect, believe, or anticipate will or may occur in the future, or that address plans and objectives of management for future operations, are forward-looking statements. The words "anticipate," "assume," "believe," "budget," "estimate," "expect," "forecast," "intend," "plan," "project," "will," and similar expressions are intended to identify forward-looking statements. Forward-looking statements appear in a number of places in this Form 10-Q, and include statements about such matters as:

- the amount and nature of future capital expenditures and the availability of liquidity and capital resources to fund capital expenditures;
- the drilling of wells and other exploration and development activities and plans, as well as possible future acquisitions;
- the possible divestiture or farm-down of, or joint venture relating to, certain properties;
- proved reserve estimates and the estimates of both future net revenues and the present value of future net revenues associated with those proved reserve estimates;
- future oil, natural gas, and NGL production estimates;
- our outlook on future oil, natural gas, and NGL prices, well costs, and service costs;
- cash flows, anticipated liquidity, and the future repayment of debt;
- business strategies and other plans and objectives for future operations, including plans for expansion and growth of operations or to defer capital investment, and our
  outlook on our future financial condition or results of operations; and
- other similar matters such as those discussed in the "Management's Discussion and Analysis of Financial Condition and Results of Operations" section of this report.

Our forward-looking statements are based on assumptions and analyses made by us in light of our experience and our perception of historical trends, current conditions, expected future developments, and other factors that we believe are appropriate under the circumstances. These statements are subject to a number of known and unknown risks and uncertainties which may cause our actual results and performance to be materially different from any future results or performance expressed or implied by the forward-looking statements. These risks are described in the "Risk Factors" section of our 2010 Annual Report on Form 10-K and in this Form 10-Q and include such factors as:

- the volatility of oil, natural gas, and NGL prices, and the effect it may have on our profitability, financial condition, cash flows, access to capital, and ability to grow;
- the continued weakness in economic conditions and uncertainty in financial markets;

- our ability to replace reserves in order to sustain production;
- our ability to raise the substantial amount of capital that is required to replace our reserves;
- our ability to compete against competitors that have greater financial, technical, and human resources;
- the imprecise estimations of our actual quantities and present values of proved oil, natural gas, and NGL reserves;
- the uncertainty in evaluating recoverable reserves and other expected benefits or liabilities;
- the possibility that exploration and development drilling may not result in commercially producible reserves;
- the possibility that our planned drilling in existing or emerging resource plays using some of the latest available horizontal drilling and completion techniques is subject to drilling and completion risks and may not meet our expectations for reserves or production;
- the uncertainties associated with our reported anticipated divestiture, joint venture, farm-down, and similar transactions with respect to certain assets, including
  whether such transactions will be consummated or completed in the form or timing and for the value that we anticipate;
- the uncertainties associated with enhanced recovery methods;
- our commodity price risk management activities may result in financial losses or may limit the prices that we receive for oil, natural gas, and NGL sales;
- the inability of one or more of our customers to meet their obligations;
- price declines or unsuccessful exploration efforts result in write-downs of our asset carrying values;
- the impact that lower oil, natural gas, or NGL prices could have on our ability to borrow under our credit facility;
- the possibility that our amount of debt may limit our ability to obtain financing for acquisitions, make us more vulnerable to adverse economic conditions, and make it
  more difficult for us to make payments on our debt;
- operating and environmental risks and hazards that could result in substantial losses;
- complex laws and regulations, including environmental regulations, that result in substantial costs and other risks;
- the availability and capacity of gathering, transportation, processing, and/or refining facilities;
- our ability to sell and/or receive market prices for our oil, natural gas, and NGLs;
- new technologies may cause our current exploration and drilling methods to become obsolete;
- the uncertainties regarding the ultimate impact of potentially dilutive securities; and
- litigation, environmental matters, the potential impact of government regulations, and the use of management estimates regarding such matters.

We caution you that forward-looking statements are not guarantees of future performance and that actual results or performance may be materially different from those expressed or implied in the forward-looking statements. The forward-looking statements in this report speak as of the filing date of this report. Although we may from time to time voluntarily update our prior forward-looking statements, we disclaim any commitment to do so except as required by securities laws.

#### ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information required by this item is provided under the captions *Commodity Price Risk and Interest Rate Risk, Summary of Oil, Gas, and NGL Derivative Contracts in Place*, and *Summary of Interest Rate Risk* in Item 2 above and is incorporated herein by reference. Please refer to the sensitivity analysis within our 2010 Annual Report on Form 10-K in Part II, Item 7.

#### **ITEM 4. CONTROLS AND PROCEDURES**

We maintain a system of disclosure controls and procedures that is designed to ensure that information required to be disclosed in our SEC reports is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and to ensure that such information is accumulated and communicated to our management, including the Chief Executive Officer and the Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures.

We carried out an evaluation, under the supervision and with the participation of our management, including the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this Quarterly Report on Form 10-Q. Based upon that evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that our disclosure controls and procedures are effective for the purposes discussed above as of the end of the period covered by this Quarterly Report on Form 10-Q. There was no change in our internal control over financial reporting that occurred during our most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the effectiveness of our internal control over financial reporting.

#### PART II. OTHER INFORMATION

#### **ITEM 1. LEGAL PROCEEDINGS**

We initiated an arbitration proceeding on May 11, 2011, against Anadarko E&P Company, LP ("Anadarko"), alleging that Anadarko breached a Joint Exploration Agreement ("JEA") originally executed between Anadarko and TXCO Energy Corp. ("TXCO") in March 2008, and relating to oil and gas properties located in Maverick, Dimmitt, Webb and LaSalle Counties, Texas. We have been a party to the JEA since May 15, 2008. We assert that Anadarko is required under the JEA to tender to us our proportionate share of the leasehold interests that Anadarko acquired in TXCO's bankruptcy proceeding in February 2010. The arbitration hearing related to this dispute was held in September 2011; however, the arbitration panel has not announced its determination. If we prevail in this matter, Anadarko could be obligated to sell to us an undivided interest of up to 8.333% (or up to approximately 27,000 net acres) of the total leasehold governed by the JEA in return for our payment of a proportionate share of the price Anadarko paid TXCO in the bankruptcy proceeding (adjusted for revenues and expenses attributable to the purchased interest since January 1, 2010), or in the alternative, pay us damages in an amount to be determined by the arbitration panel.

In a separate, unrelated matter, we initiated an arbitration proceeding against Springfield Pipeline, LLC ("Springfield"), a wholly owned affiliate of Anadarko Petroleum Corporation, and another party in October 2011, alleging that Springfield and the other party had unreasonably withheld or delayed consents, which are closing conditions of our Acquisition and Development Agreement with Mitsui E&P Texas LP, and which are required (but are not to be unreasonably withheld or delayed) under an Agreement for the Construction, Ownership and Operation of Midstream Assets in Maverick, Dimmit, Webb and La Salle Counties, Texas, executed by us and Springfield and under certain other related gathering agreements. We have dismissed our claims in the arbitration proceeding against the other party in return for its consent. We have requested an expedited arbitration hearing under the commercial rules of the American Arbitration Association and are endeavoring to conclude this arbitration proceeding against Springfield during the fourth quarter of 2011.

With the exception of the above disclosures, there have been no material changes from the legal proceedings as previously disclosed in our 2010 Form 10-K in response to Item 3 of Part I of such Form 10-K. See *Note 7 - Commitments and Contingencies*, in Part I, Item 1 of this report, which is incorporated by reference herein.

#### **ITEM 1A. RISK FACTORS**

The following risk factors update should be considered in addition to the risk factors previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2010.

Proposed federal and state legislative and regulatory initiatives relating to hydraulic fracturing could result in increased costs and additional operating restrictions or delays.

Hydraulic-fracturing is an essential and common practice in the oil and gas industry used to stimulate production of oil, natural gas, and associated liquids from dense subsurface rock formations. We routinely apply hydraulic-fracturing techniques to many of our oil and natural gas properties, including our unconventional resource plays in the Granite Wash of Texas and Oklahoma, the Eagle Ford shale of south Texas, and the Bakken/Three Forks resource play in North Dakota. Hydraulic-fracturing involves using water, sand, and certain chemicals to fracture the hydrocarbon-bearing rock formation to allow the flow of hydrocarbons into the wellbore. The process is typically regulated by state oil and natural gas commissions; however, the EPA has asserted federal regulatory authority over certain hydraulic-fracturing activities involving diesel under the Safe Drinking Water Act and has begun the process of drafting guidance documents related to this newly asserted regulatory authority. In addition, legislation has been introduced before Congress, called the Fracturing Responsibility and Awareness of Chemicals Act, to provide for federal regulation of hydraulic-fracturing and to require disclosure of the chemicals used in the hydraulic-fracturing process.

Certain states in which we operate, including Pennsylvania, Texas and Wyoming, have adopted, and other states are considering adopting, regulations that could impose more stringent permitting, public disclosure, waste disposal and well construction requirements on hydraulic-fracturing operations or otherwise seek to ban fracturing activities altogether. For example, Texas adopted a law in June 2011 requiring disclosure to the Railroad Commission of Texas (RCT) and the public of certain information regarding the components used in the hydraulic-fracturing process. In addition to state laws, local land use restrictions, such as city ordinances, may restrict or prohibit the performance of well drilling in general and/or hydraulic fracturing in particular. In the event state, local, or municipal legal restrictions are adopted in areas where we are currently conducting, or in the future plan to conduct operations, we may incur additional costs to comply with such requirements that may be significant in nature, experience delays or curtailment in the pursuit of exploration, development, or production activities, and perhaps even be precluded from the drilling and/or completion of wells.

There are certain governmental reviews either underway or being proposed that focus on environmental aspects of hydraulic-fracturing practices. The White House Council on Environmental Quality is coordinating a review of hydraulic-fracturing practices, and a committee of the United States House of Representatives has conducted an investigation of hydraulic-fracturing practices. Furthermore, a number of federal agencies are analyzing, or have been requested to review, a variety of environmental issues associated with hydraulic fracturing. The EPA has commenced a study of the potential environmental effects of hydraulic fracturing on drinking water and groundwater, with initial results expected to be available by late 2012 and final results by 2014. In addition, the U.S. Department of Energy is conducting an investigation into practices the agency could recommend to better protect the environment from drilling using hydraulic-fracturing completion methods. Also, the U.S. Department of the Interior is considering disclosure requirements or other mandates for hydraulic fracturing on federal lands.

Additionally, certain members of the Congress have called upon the U.S. Government Accountability Office to investigate how hydraulic fracturing might adversely affect water resources, the U.S. Securities and Exchange Commission to investigate the natural gas industry and any possible misleading of investors or the public regarding the economic feasibility of pursuing natural gas deposits in shales by means of hydraulic fracturing, and the U.S. Energy Information Administration to provide a better understanding of that agency's estimates regarding natural gas reserves, including reserves from shale formations, as well as uncertainties associated with those estimates. These ongoing or proposed studies, depending on their course and results obtained, could spur initiatives to further regulate hydraulic fracturing under the Safe Drinking Water Act or other regulatory processes.

Further, on July 28, 2011, the EPA issued proposed rules that would subject all oil and gas operations (production, processing, transmission, storage and distribution) to regulation under the New Source Performance Standards (NSPS) and National Emission Standards for Hazardous Air Pollutants (NESHAPS) programs. The EPA proposed rules also include NSPS standards for completions of hydraulically fractured gas wells. These standards include the reduced emission completion (REC) techniques developed in EPA's Natural Gas STAR program along with the pit flaring of gas not sent to the gathering line. The standards would be applicable to newly drilled and fractured wells as well as existing wells that are refractured. Further, the proposed regulations under NESHAPS include maximum achievable control technology (MACT) standards for those glycol dehydrators and storage vessels at major sources of hazardous air pollutants not currently subject to MACT standards. We are currently evaluating the effect these proposed rules could have on our business. Final action on the proposed rules is expected no later than February 28, 2012.

Increased regulation and attention given to the hydraulic fracturing process could lead to greater opposition, including litigation, to oil and gas production activities using hydraulic fracturing techniques. Additional legislation or regulation could also lead to operational delays or increased operating costs in the production of oil, natural gas, and associated liquids including from the development of shale plays, or could make it more difficult to perform hydraulic fracturing. The adoption of additional federal, state or local laws or the implementation of regulations regarding hydraulic fracturing could potentially cause a decrease in the completion of new oil and gas wells, increased compliance costs and time, which could adversely affect our financial position, results of operations and cash flows.

On October 20, 2011, EPA announced a schedule for development of standards for disposal of wastewater produced from shale gas operations to publicly owned treatment works (POTWs). The regulations will be developed under EPA's Effluent Guidelines Program under the authority of the Clean Water Act. EPA anticipates issuing the proposed rules in 2014.

### Certain U.S. federal income tax deductions currently available with respect to oil and natural gas exploration and production may be eliminated as a result of future legislation.

On September 12, 2011, President Obama sent to Congress a legislative package that included proposed legislation that, if enacted into law, would eliminate certain key U.S. federal income tax incentives currently available to oil and natural gas exploration and production companies. These changes include, among other proposals:

- the repeal of the percentage depletion allowance for oil and natural gas properties;
- the elimination of current deductions for intangible drilling and development costs;
- · the elimination of the deduction for certain domestic production activities; and
- an extension of the amortization period for certain geological and geophysical expenditures.

These proposals also were included in President Obama's Proposed Fiscal Year 2012 Budget. It is unclear whether these or similar changes will be enacted. The passage of this legislation or any similar changes in federal income tax laws could eliminate or postpone certain tax deductions that are currently available with respect to oil and natural gas exploration and development. Any such changes could have an adverse effect on our financial position, results of operations and cash flows.

## Our ability to produce crude oil and natural gas economically and in commercial quantities could be impaired if we are unable to acquire adequate supplies of water for our drilling operations and/or completions or are unable to dispose of or recycle the water we use at a reasonable cost and in accordance with applicable environmental rules.

The hydraulic fracturing process on which we depend to produce commercial quantities of crude oil, natural gas and associated liquids from many reservoirs requires the use and disposal of significant quantities of water.

Our inability to secure sufficient amounts of water, or to dispose of or recycle the water used in our operations, could adversely impact our operations. Moreover, the imposition of new environmental initiatives and regulations could include restrictions on our ability to conduct certain operations such as hydraulic fracturing or disposal of wastes, including, but not limited to, produced water, drilling fluids and other wastes associated with the exploration, development or production of natural gas.

Compliance with environmental regulations and permit requirements governing the withdrawal, storage and use of surface water or groundwater necessary for hydraulic fracturing of wells may increase our operating costs and cause delays, interruptions or termination of our operations, the extent of which cannot be predicted, all of which could have an adverse effect on our operations and financial condition.

#### ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(c) The following table provides information about purchases by the Company or any "affiliated purchaser" (as defined in Rule 10b-18(a)(3) under the Exchange Act) during the fiscal quarter ended September 30, 2011, of shares of the Company's common stock, which is the sole class of equity securities registered by the Company pursuant to Section 12 of the Exchange Act:

#### PURCHASES OF EQUITY SECURITIES BY ISSUER AND AFFILIATED PURCHASERS

	(a)	(b)	(c)	(d)
Period	Total Number of Shares Purchased <sup>(1)</sup>	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Maximum Number of Shares that May Yet Be Purchased Under the Program <sup>(2)</sup>
07/01/11 - 07/31/11	5,125	\$ 73.82		3,072,184
08/01/11 - 08/31/11	118,379	\$ 75.56		3,072,184
09/01/11 - 09/30/11	_	\$ _		3,072,184
Total:	123,504	\$ 75.49		3,072,184

(1) Consists of a total of 123,504 shares withheld (under the terms of grants under the Equity Incentive Compensation Plan) to offset tax withholding obligations that occur upon the delivery of outstanding shares underlying RSUs and PSUs.

(2) In July 2006, the Company's Board of Directors approved an increase in the number of shares that may be repurchased under the original August 1998 authorization to an aggregate of 6,000,000. Accordingly, as of this filing, the Company has authorization to repurchase 3,072,184 shares of common stock on a prospective basis. The shares may be repurchased from time to time in open market transactions or privately negotiated transactions, subject to market conditions and other factors, including certain provisions of the Company's credit facility and other agreements, provisions of SM Energy's 6.625% Senior Notes and compliance with securities laws. Stock repurchases may be funded with existing cash balances, internal cash flow, and borrowings under the Company's credit facility. The stock repurchase program may be suspended or discontinued at any time.

The payment of dividends and stock repurchases are subject to covenants in our credit facility, including the requirement that we maintain certain levels of stockholders' equity and the limitation that does not allow our annual dividend payments to exceed \$50.0 million. The payment of dividends is also subject to covenants under our 6.625% Senior Notes, including covenants limiting the payment of dividends on our common stock to \$6.5 million in the aggregate in any given calendar year during the eight year term of the notes.

October 13, 2011

Toru Matsui Mitsui E&P Texas LP c/o Mitsui E&P USA LLC 9 Greenway Plaza, Suite 1250 Houston, Texas 77046

Re: First Amendment to Acquisition and Development Agreement, dated as of June 29, 2011, between SM Energy Company ("<u>SM</u>") and Mitsui E&P Texas LP ("<u>Mitsui</u>" and such agreement, the "<u>ADA</u>")

Dear Mr. Matsui:

Reference is made in this letter (this "<u>Letter</u>") to the ADA. Capitalized terms used in this Letter and not otherwise defined herein shall have the meanings given such terms in the ADA. Pursuant to the terms and conditions of this Letter, SM and Mitsui desire to memorialize certain agreements between the Parties relating to the ADA as follows:

1. Section 9.1(a) of Annex A to the ADA is hereby amended and restated in its entirety as follows:

"(a) by SM, if any of the conditions set forth in *Section 7.2* (other than the conditions set forth in *Section 7.2(c)*, *Section 7.2(d)* or *Section 7.2(g)*) have not been satisfied by Mitsui on or before December 23, 2011 (the "*Outside Termination Date*");"

2. The Parties acknowledge and agree that the provisions of Sections 11.1 through 11.5 of the ADA, Sections 11.7 through 11.9 of the ADA and Sections 11.11 through 11.19 of the ADA are incorporated herein by this reference as if set out fully herein and shall apply in all respects to this Letter.

3. SM and Mitsui hereby ratify and confirm the terms and provisions of the ADA, to the extent modified hereby, for all purposes.

If you are in agreement with the foregoing, please countersign this Letter in the space provided below and return to my attention.

#### PERFORMANCE STOCK UNIT AWARD AGREEMENT

This Performance Stock Unit Award Agreement (the "Agreement") is made effective as of **September 6, 2011** (the "Award Date"), by and between SM Energy Company, a Delaware corporation (the "Company"), and [Name] (the "Participant") to whom performance stock units have been awarded under the Company's Equity Incentive Compensation Plan, as amended (the "Plan").

Effective as of July 1, 2011, the Company made an award of Performance Units to Participant pursuant to a Performance Stock Unit Award Agreement (the "Prior Award Agreement"). This Agreement and the award of Performance Units hereunder is intended to replace and supersede the Prior Award Agreement and the award of Performance Units thereunder. Accordingly, the Company and Participant hereby agree to terminate the Prior Award Agreement, and the Participant hereby waives, surrenders and releases the Company from any claim related to the Prior Award Agreement or the Performance Units related thereto.

Pursuant to the terms of the Plan and this Agreement, as of the Award Date, the Company makes an award (the "Award") to the Participant of [Number] performance stock units (the "Performance Units"). Capitalized terms used but not defined in this Agreement shall have the meanings given to them in the Plan.

#### ARTICLE I

#### PERFORMANCE UNITS

1.1 Performance Units and Performance Period. The Performance Units represent the right to receive, upon the payment of the Performance Units pursuant to Section 1.4 hereof after the completion of the Performance Period (as defined below), a number of shares of the Company's common stock, \$.01 par value per share (sometimes referred to herein as the "Common Stock"), that will be calculated as set forth in Section 1.2 below based on the extent to which the Company's Performance Criteria (as defined in Section 1.2) have been achieved and the extent to which the Performance Units have vested. Any Common Stock that is issued pursuant to any provision of this Agreement may be referred to in this Agreement as a "Share" or "Shares." Such actual number of Shares that may be issued upon payment of the Performance Units granted herein may be referred to as the "target" number of Performance Units granted on the Award Date. The number of Performance Units shall be the three-year period beginning on July 1, 2011 and ending on June 30, 2014.

#### 1.2 Determination of Number of Shares Earned.

(a) <u>Performance Criteria</u>. The actual number of Shares that may be earned from the Performance Units and issued upon payment of the Performance Units after completion of the Performance Period shall be based upon the Company's achievement of performance criteria (the "Performance Criteria") established by the Compensation Committee of the Board of Directors of the Company (the "Committee") for the Performance Period in accordance with the terms of the Plan and as set forth below and reflected in the payout matrix (the "Payout Matrix") attached as <u>Appendix A</u> hereto and discussed further in subsection (d) hereof. The

Performance Criteria for the calculation of the actual number of Shares to be issued upon payment of the Performance Units as reflected in the Payout Matrix are based on a combination of (i) the absolute measure of the cumulative total shareholder return ("TSR") and associated Compound Annual Growth Rate ("CAGR") of the Company for the Performance Period, and (ii) the relative measure of the Company's TSR and CAGR for the Performance Period compared with the cumulative TSR and CAGR of the Peer Companies (as defined below) for the Performance Period as reflected in the Company's Performance Share Plan Peer Group Custom Index (the "Custom Index") to be specifically prepared by Standard & Poor's, a division of The McGraw-Hill Companies, Inc. ("S&P"), for the purpose of administering the Company's Long-Term Incentive Plan.

(b) <u>Calculation of TSR and CAGR</u>. The TSR and CAGR of the Company and the Peer Companies for the Performance Period shall be calculated in accordance with the methodology utilized by S&P with respect to the Custom Index.

(c) <u>Peer Companies and Custom Index</u>. The "Peer Companies" to be reflected in the Custom Index shall consist of the constituents of the Oil & Gas Exploration & Production GIC Sub-Industry Group in the S&P SmallCap 600 Index and the S&P MidCap 400 Index, excluding the Company. The Custom Index will be equally weighted, and will be adjusted to include the dividend payments of the constituents of the Custom Index. The Custom Index will be rebalanced on a quarterly basis, and will also be rebalanced whenever there are additions and deletions to the S&P SmallCap 600 and the S&P MidCap 400 indices. The Custom Index is the exclusive property of S&P. The Company has contracted with S&P to maintain and calculate the Custom Index. S&P shall have no liability for any errors or omissions in calculating the Custom Index.

(d) Payout Matrix. The Payout Matrix attached as Appendix A hereto sets forth the possible multipliers, which range from zero percent (0%) to two hundred percent (200%), which may be applied to the number of vested Performance Units to determine the actual number of Shares to be issued upon payment of the vested Performance Units after the completion of the Performance Period. The final multiplier (the "Final Multiplier") shall be determined by the Committee after the completion of the Performance Period based on the two variables that comprise the Performance Criteria, related to (i) the Company's TSR and CAGR for the Performance Period, and (ii) the Peer Companies' TSR and CAGR for the Performance Period as reflected in the Custom Index. Subject to Section 1.2(e), the number of Shares, if any, that shall be issued to the Participant upon payment of the Performance Units shall be calculated as an amount equal to (A) the number of Performance Units that have vested in accordance with Section 1.3 or Section 1.6 hereof, multiplied by (B) the Final Multiplier, as determined by the Committee in accordance with the Payout Matrix (such number of Shares). There shall be no rounding of variables or extrapolation of variables between data points within the Payout Matrix, and the data point for which the associated variables equal or exceed the target variables for such data point, but do not result in qualification for another higher data point, shall be utilized with respect to the Final Multiplier. Any fractional Shares which would otherwise result from application of the Final Multiplier shall be to the nearest whole Shares of Common Stock.

(e) <u>Payout Value Limit</u>. Notwithstanding any other provision of this Agreement, under no circumstances shall (i) the product of (A) the number of Payout Shares as calculated in accordance with the Payout Matrix under the provisions of Section 1.2(d),

multiplied by (B) the per share closing price of the Company's Common Stock on June 30, 2014, as reported by the principal exchange or market on which the Company's Common Stock is then traded (the "Payout Closing Price") (with such product referred to as the "Payout Matrix Value"), exceed (ii) the product of (C) the number of Performance Units multiplied by (D) \$449 (with such product referred to as the "Payout Value Limit"). If the Payout Matrix Value would otherwise exceed the Payout Value Limit, then the number of Payout Shares shall be reduced to an amount equal to (x) the Payout Value Limit divided by (y) the Payout Closing Price, with any fractional Shares which would otherwise result from such computation to be rounded up to the nearest whole Share of Common Stock.

#### 1.3 <u>Vesting of Performance Units</u>.

(a) <u>Vesting</u>. Subject to the provisions contained herein, the Performance Units shall vest over the Performance Period as follows (the "PSU Vesting Schedule"):

1/7th (approximately 14.3%) on July 1, 2012 2/7ths (approximately 28.6%) on July 1, 2013 4/7ths (approximately 57.1%) on July 1, 2014

In addition, the Performance Units may become fully vested or be forfeited under certain circumstances specified in this Agreement. As of the Award Date, the Participant must be an employee of the Company or a subsidiary thereof. If the Participant ceases to be an employee of the Company or a subsidiary thereof prior to the vesting of all of the Performance Units pursuant to the PSU Vesting Schedule, the Participant shall forfeit the remaining unvested Performance Units under the Award, except as otherwise provided in this Section 1.3 and Section 1.6.

(b) <u>Continued Vesting Upon Early Retirement</u>. The Performance Units shall, notwithstanding any other provisions of this Section 1.3, continue to vest according to the PSU Vesting Schedule after the termination of the Participant's employment with the Company or a subsidiary thereof if (i) such termination is the result of the Participant's retirement from the Company or a subsidiary thereof upon the Participant's having both reached the age of sixty (60) and completed twelve (12) years of service with the Company or a subsidiary thereof, and (ii) the Participant does not after such early retirement become employed on a full-time basis by a competitor of the Company prior to the earlier of the payment of the Performance Units or the Participant's reaching the age of sixty-five (65). Any such continued vesting of the Performance Units pursuant to this Section 1.3(b) will not result in an acceleration of the PSU Payment Date (as defined in Section 1.4), since the number of Shares earned from the Performance Units shall be calculated after the completion of the Performance Period.

(c) <u>Acceleration Upon Death, Total Disability or Normal Retirement</u>. The Performance Units shall become fully vested, notwithstanding any other provisions of this Section 1.3, upon termination of the Participant's employment with the Company or a subsidiary thereof because of death, Total Disability (as defined below), or retirement upon reaching the Company's normal retirement age of sixty-five (65). Any such acceleration of the vesting of the Performance Units pursuant to this Section 1.3(c) will not result in an acceleration of the PSU Payment Date, since the number of Shares earned from the Performance Units shall be calculated after the completion of the Performance Period. For purposes of this Agreement, "Total Disability" means a medically determinable physical or

mental impairment that can be expected to result in death or can be expected to last for a continuous period of not less than 12 months, by reason of which the Participant is unable to engage in any substantial gainful activity or is receiving income replacement benefits for a period of not less than three months under an accident and health plan covering employees of the Company.

(d) <u>Termination for Cause</u>. Notwithstanding any other provisions of this Section 1.3, the Participant shall forfeit all Performance Units under this Award, including those that have previously vested, upon the termination of the employment of the Participant by the Company or a subsidiary thereof prior to the completion of the Performance Period for cause, which term is specifically not capitalized as such term is in Section 1.6(a) of this Agreement, it being the specific intent of the Company and the Participant that "cause" in this instance shall be broadly defined as any event, action, or inaction by the Participant that would reasonably be the basis for an employer to terminate the employment of the affected individual.

1.4 Payment of Performance Units. Following the last day of the Performance Period and prior to the payment of the earned and vested Performance Units on or about the PSU Payment Date, the Committee shall determine, and certify in writing to the extent deemed necessary or advisable or as required to comply with Section 162(m) of the Internal Revenue Code of 1986, as amended (the "Code"), (i) the extent to which the Performance Criteria have been achieved over the Performance Period, and (ii) the Final Multiplier. Subject to Section 1.2(e), the Final Multiplier shall then be applied to the number of vested Performance Units to determine the number of Payout Shares (also sometimes referred to herein as the "Earned Shares"), if any, to be issued to the Participant in payment of the Performance Units. The determination of the Earned Shares by the Committee shall be binding on the Participant and conclusive for all purposes. The Earned Shares, if any, shall be issued to the Participant in payment of the Performance Units, the Company shall deliver to the Participant evidence of book-entry Shares or a certificate for the number of Shares issued to the Participant in payment of the Performance Units. The Earned Shares shall not be subject to any holding or transfer restrictions after payment of the Performance Units.

1.5 <u>Transfer Restrictions for Unpaid Performance Units</u>. Performance Units that have not been paid shall not be transferable by the Participant, and the Participant shall not be permitted to sell, transfer, pledge, assign, or otherwise alienate or encumber such Performance Units or the Shares issuable in payment thereof, other than (i) to the person or persons to whom the Participant's rights under such Performance Units pass by will or the laws of descent and distribution, (ii) to the spouse or the descendants of the Participant or to trusts for such persons to whom or which the Participant may transfer such Performance Units by gift, (iii) to the legal representative of any of the foregoing, or (iv) pursuant to a qualified domestic relations order as defined under Section 414(p) of the Code or a similar order or agreement pursuant to state domestic relations law (including a community property law) relating to the provision of child support, alimony payments, or marital property rights to a spouse, former spouse, child, or other dependent of the Participant. Any such transfer shall be made only in compliance with the Securities Act of 1933 and the requirements therefor as set forth by the Company. Any attempted transfer in contravention of the foregoing provisions shall be null and void and of no effect.

- 1.6 Change of Control Termination.
  - (a) <u>Vesting upon Change of Control Termination</u>. Notwithstanding any other

provision of this Agreement, the Performance Units shall become fully vested upon a Change of Control Termination. For purposes of this Agreement, a "Change of Control Termination" occurs upon the termination of the Participant's employment with the Company or a subsidiary thereof in the event that (i) a Change of Control (as defined in the Plan) of the Company occurs, and (ii) the Participant's employment with the Company or a subsidiary thereof is subsequently terminated without Cause (as defined below) or the Participant terminates his or her employment with the Company or a subsidiary thereof for Good Reason (as defined below), and such termination of employment occurs (x) within 30 months of the Change of Control and (y) prior to the normal completion of vesting of the Performance Units at the end of the Performance Period. The normal vesting and payment provisions in Article I of this Agreement shall not be affected by the first sentence of this subsection if a Change of Control of the Company or a subsidiary thereof. If the Participant has entered into a separate written Change of Control Executive Severance Agreement or Change of Control Severance Agreement, with the Company, the terms "Cause" and "Good Reason" used herein shall have the meanings set forth in such Change of Control Severance Plan (the "Cause" and "Good Reason" used herein shall have the meanings set forth in such Change of Control Severance Plan (the "Change of Control Severance Plan").

(b) <u>Payment upon Change of Control Termination</u>. Notwithstanding any other provisions of this Agreement to the contrary, in the event of a Change of Control Termination with respect to the Participant's employment with the Company or a subsidiary thereof as set forth in Section 1.6(a) above, the vested Performance Units shall be paid in accordance with this Section 1.6(b). In the event of a Change of Control Termination, the Committee shall determine the extent to which the Performance Criteria have been achieved and the Final Multiplier to apply to the vested Performance Units by utilizing the same method as set forth in Section 1.2 hereof; provided, however, that the Performance Period for the calculation of the TSR and CAGR of the Company and the Peer Companies to obtain the Final Multiplier shall be shortened to end as of the effective date of the Change of Control Subject to Section 1.2(e), the Final Multiplier shall then be applied to the number of vested Performance Units. In the event of a Change of Control Termination, any Earned Shares shall be paid to the Participant in payment of the Performance Units either in Shares or in cash of equivalent value, as determined by the Committee or other duly authorized administrator of the Plan, in its discretion, within thirty (30) days following the effective date of the Change of Such 2.11 of this Agreement.

(c) <u>Controlling Documents for Change of Control Termination</u>. To the extent that the Participant is subject to either a written Change of Control Severance Agreement or the Change of Control Severance Plan, the terms and conditions of such Change of Control Severance Agreement or Change of Control Severance Plan, as applicable, shall also apply to this Award in the event of a Change of Control Termination; provided, however, that with respect to the Performance Units under this Award, the terms of the Plan and this Agreement shall control in the event of any inconsistency between their terms and the terms of the Change of Control Severance Plan.

#### ARTICLE II

#### GENERAL PROVISIONS

2.1 <u>Adjustments Upon Changes in Capitalization</u>. In the event that a stock split, stock dividend, or other similar change in capitalization of the Company occurs, the number and kind of Shares that may be issued under this Agreement and that have not yet been issued shall be proportionately and appropriately adjusted.

2.2 <u>No Dividend Equivalents or Stockholder Rights Until Shares Issued</u>. The Performance Units shall not be credited with Dividend Equivalents. In addition, the Participant shall have no voting, transfer, liquidation, or other rights of a holder of Shares with respect to the Performance Units until such time as Shares, if any, have been issued by the Company to the Participant in payment of the Performance Units. Until the Performance Units are paid or terminated, they will represent only bookkeeping entries by the Company to evidence unfunded and unsecured obligations of the Company.

2.3 <u>Notices</u>. Any notice to the Participant relating to this Agreement shall be in writing and delivered in person or by mail, fax, or email transmission to the address or addresses on file with the Company. Any notice to the Company shall be addressed to it at its principal office, and be specifically directed to the attention of the Secretary. Anyone to whom a notice may be given under this Agreement may designate a new address by notice to that effect.

2.4 <u>Benefits of Agreement</u>. This Agreement shall inure to the benefit of and be binding upon each successor of the Company and the Participant's heirs, legal representatives, and permitted transferees. This Agreement and the Plan shall be the sole and exclusive source of any and all rights that the Participant and the Participant's heirs, legal representatives, and permitted transferees may have with respect to this Award, the Performance Units, and the Plan.

2.5 <u>Resolution of Disputes</u>. Any dispute or disagreement that arises under, or is a result of, or in any way relates to, the interpretation, construction, or applicability of this Agreement shall be resolved as determined by the Committee, or the Board of Directors of the Company (the "Board"), or by any other committee appointed by the Board for such purpose. Any determination made hereunder shall be final, binding, and conclusive for all purposes.

2.6 <u>Controlling Documents</u>. The provisions of the Plan are hereby incorporated into this Agreement by reference. In the event of any inconsistency between this Agreement and the Plan, the Plan shall control.

2.7 <u>Amendments</u>. This Agreement may be amended only by a written instrument executed by both the Company and the Participant.

2.8 <u>No Right of Participant to Continued Employment</u>. Nothing contained in this Agreement or the Plan shall confer on the Participant any right to continue to be employed by the Company or any subsidiary thereof, or shall limit the Company's right to terminate the employment of the Participant at any time; provided, however, that nothing contained in this Agreement shall affect any separate contractual provisions that exist between the Participant and the Company or its subsidiaries with respect to the employment of the Participant.

2.9 <u>Vesting Dates and Payment Dates</u>. In the event that any vesting date, payment date, or any other measurement date with respect to this Award does not fall on a normal business day, such date shall be deemed to occur on the next following normal business day.

2.10 <u>Tax Withholding</u>. The Company may make such provisions and take such steps as it deems necessary or appropriate for the withholding of any taxes that the Company is required by law or regulation of any governmental authority, whether Federal, state, or local, to withhold in connection with the Performance Units or Shares subject to this Agreement. The Participant shall elect, prior to any tax withholding event related to this Award and at a time when the Participant is not aware of any material nonpublic information about the Company and the Participant would be permitted to engage in a transaction in the Company's securities under the Company's Securities Trading Policy, whether the Participant will satisfy all or part of such tax withholding requirement by paying the taxes in cash or by having the Company withhold Shares having a fair market value equal to the minimum statutory withholding that may be imposed on the transaction (based on minimum statutory withholding rates for Federal, state, and local tax purposes, as applicable, that are applicable to such transaction). The Participant's election shall be irrevocable, made in writing, signed by the Participant, and shall be subject to any restrictions or limitations that the Committee, in its sole discretion, deems appropriate.

2.11 <u>Compliance with Section 409A of the Code</u>. Notwithstanding any provision in this Agreement to the contrary, to the extent that this Agreement constitutes a nonqualified deferred compensation plan or arrangement to which Section 409A of the Code applies, the administration of this Award (including the time and manner of payments under the Award and this Agreement) shall comply with Section 409A of the Code. In connection therewith, any payment to the Participant with respect to the Award under this Agreement which Section 409A(a)(2)(B)(i) of the Code indicates may not be made before the date which is six months after the date of the Participant's separation from employment service (the "Section 409A Six-Month Waiting Period"), as a result of the fact that the Participant is a specified key employee referred to in Section 409A(a)(2)(B)(i) of the Code, shall not occur or be made during the Section 409A Six-Month Waiting Period but rather shall be delayed, if such payment would otherwise occur during the Section 409A Six-Month Waiting Period.

2.12 Personal Data. The Participant hereby consents to the collection, use, and transfer, in electronic or other form, of the Participant's personal data as described in this Agreement by and among, as applicable, the Company and its affiliates for the exclusive purpose of implementing, administering, and managing the Participant's participation in the Plan. The Company holds, or may receive from any agent designated by the Company, certain personal information about the Participant, including, but not limited to, the Participant's name, home address and telephone number, date of birth, social security insurance number or other identification number, salary, nationality, job title, any shares of Common Stock held, details of this Award and any other rights to shares of Common Stock awarded, canceled, exercised, vested, unvested, or outstanding in the Participant's favor, for the purpose of implementing, administering, and managing the Plan, including complying with applicable tax and securities laws (the "Personal Data"). The Personal Data may be transferred to any third parties assisting in the implementation, administration, and management of the Plan. The Participant authorizes such recipients of the Personal Data to receive, possess, use, retain, and transfer the Personal Data, in electronic or other form, for the purposes described above. The Participant may, at any time, view the Personal Data, request additional information about the storage and processing of the Personal Data, require any necessary amendments to the Personal Data, or refuse or withdraw the consents herein, in any case without cost, by contacting the Secretary of the Company in writing. Any such refusal or withdrawal of

the consents herein may affect the Participant's ability to participate in the Plan.

2.13 <u>Electronic Delivery of Documents</u>. The Company may, in its sole discretion, deliver any documents related to this Award, or any future awards that may be granted under the Plan, by electronic means, or request the Participant's consent to participate in the Plan or other authorizations from the Participant in connection therewith by electronic means. The Participant hereby consents to receive such documents by electronic delivery and, if requested, to participate in the Plan through an on-line or electronic system established and maintained by the Company or another third party designated by the Company.

2.14 <u>Receipt of Award and Related Documents</u>. The Participant hereby acknowledges the receipt, either directly or electronically, of the Award, a copy of the Plan, and a prospectus for the Plan.

2.15 <u>Execution and Counterparts</u>. This Agreement may be executed in counterparts. Execution of a written instrument for this Agreement may be evidenced by any appropriate form of electronic signature or affirmative email or other electronic response attached to or logically associated with such written instrument, which is executed or adopted by a party with an indication of the intention by such party to execute or adopt such instrument for purposes of execution thereof.

IN WITNESS WHEREOF, the Company and the Participant have caused this Performance Stock Unit Award Agreement to be entered into effective as of the Award Date.

#### SM ENERGY COMPANY

#### RESTRICTED STOCK UNIT AWARD AGREEMENT

This Restricted Stock Unit Award Agreement (the "Agreement") is made effective as of **September 6, 2011** (the "Award Date"), by and between SM Energy Company, a Delaware corporation (the "Company"), and [Name] (the "Participant") to whom restricted stock units have been awarded under the Company's Equity Incentive Compensation Plan, as amended (the "Plan").

Effective as of July 1, 2011, the Company awarded Units (as defined below) to Participant pursuant to a Restricted Stock Unit Award Agreement. The Company desires to make an additional award of Units to the Participant pursuant to this Agreement, and in connection therewith, also makes an award of performance stock units to the Participant as of the date hereof. Accordingly, this Agreement and the related Award shall not be effective unless and until the Participant and the Company each execute and deliver that certain Performance Stock Unit Award Agreement, effective as of the date hereof.

Pursuant to the terms of the Plan and this Agreement, as of the Award Date the Company has made an award (the "Award") to the Participant of [Number] restricted stock units (the "Units"). Capitalized terms used but not defined in this Agreement shall have the meanings given to them in the Plan.

#### ARTICLE I

#### RESTRICTED STOCK UNITS

1.1 <u>Units</u>. Each Unit represents the right to receive one share of the Company's common stock, \$.01 par value per share (sometimes referred to herein as the "Common Stock"), to be delivered upon settlement of the Units as set forth in Section 1.3 below, subject to the terms and conditions set forth in the Plan and this Agreement. Any Common Stock that is issued pursuant to any provision of this Agreement may be referred to in this Agreement as a "Share" or "Shares."

1.2 <u>Vesting of Units</u>.

(a) <u>Vesting</u>. Subject to the provisions contained herein, the Units shall vest as follows (the "RSU Vesting Schedule"):

1/7<sup>th</sup> (approximately 14.3%) on July 1, 2012 2/7<sup>ths</sup> (approximately 28.6%) on July 1, 2013 4/7<sup>ths</sup> (approximately 57.1%) on July 1, 2014

In addition, the Units may become fully vested or be forfeited under certain circumstances specified in this Agreement. As of the Award Date, the Participant must be an employee of the Company or a subsidiary thereof. If the Participant ceases to be an employee of the Company or a subsidiary thereof prior to the vesting of all of the Units pursuant to the RSU Vesting Schedule, the Participant shall forfeit the remaining unvested Units under the Award, except as otherwise provided in this Section 1.2 and Section 1.5.

(b) <u>Continued Vesting Upon Early Retirement</u>. The Units shall, notwithstanding any other provision of this Section 1.2, continue to vest according to the RSU Vesting Schedule after

the termination of the Participant's employment with the Company or a subsidiary thereof if (i) such termination is the result of the Participant's retirement from the Company or a subsidiary thereof upon the Participant's having both reached the age of sixty (60) and completed twelve (12) years of service with the Company or a subsidiary thereof, and (ii) the Participant does not after such early retirement become employed on a full-time basis by a competitor of the Company prior to the earlier of the settlement of the Units or the Participant's reaching the age of sixty-five (65).

(c) <u>Acceleration Upon Death, Total Disability or Normal Retirement</u>. The Units shall become fully vested, notwithstanding any other provision of this Section 1.2, upon termination of the Participant's employment with the Company or a subsidiary thereof because of death, Total Disability (as defined below), or retirement upon reaching the Company's normal retirement age of sixty-five (65). In the event of such acceleration of the vesting of the Units, the RSU Settlement Date (as defined in Section 1.3) shall also be accelerated to permit prompt settlement of the Units. For purposes of this Agreement, "Total Disability" means a medically determinable physical or mental impairment that can be expected to result in death or can be expected to last for a continuous period of not less than 12 months, by reason of which the Participant is unable to engage in any substantial gainful activity or is receiving income replacement benefits for a period of not less than three months under an accident and health plan covering employees of the Company.

(d) <u>Termination for Cause</u>. Notwithstanding any other provision of this Section 1.2, the Participant shall forfeit any unvested and unsettled Units under this Award upon the termination of the employment of the Participant by the Company or a subsidiary thereof for cause, which term is specifically not capitalized as such term is in Section 1.5(a) of this Agreement, it being the specific intent of the Company and the Participant that "cause" in this instance shall be broadly defined as any event, action, or inaction by the Participant that would reasonably be the basis for an employer to terminate the employment of the affected individual.

1.3 Settlement of Units. The portion of the Units that vest on a particular vesting installment date as set forth in the RSU Vesting Schedule shall be settled on such vesting installment date (the "RSU Settlement Date"), provided that such portion of the Units has not been previously terminated. Settlement of the vested Units may be made (a) solely through the issuance of Shares or (b) at the mutual election of the Participant and the Company, in a combination of Shares and cash. The cash value of Units settled in cash shall be based on the closing price of a Share as reported on the New York Stock Exchange or other applicable public market on the trading day corresponding to the RSU Settlement Date. In no event shall the total value of Unit settlements with the Participant under the Plan during any calendar year exceed the value at the time of settlement of the maximum number of Shares issuable to any one participant under the Plan during any calendar year pursuant to Section 4.1 of the Plan. Upon the settlement of the Units through the issuance of Shares, the Company shall deliver to the Participant evidence of book-entry Shares or a certificate for the number of Shares issued to the Participant in settlement of the Units. The Shares shall not be subject to any holding or transfer restrictions after settlement of the Units. The Participant shall not be permitted to elect to further defer settlement beyond the RSU Settlement Date pursuant to Section 6.1(b)(ii) of the Plan.

1.4 <u>Transfer Restrictions</u>. Outstanding Units that have not been settled shall not be transferable by the Participant, and the Participant shall not be permitted to sell, transfer, pledge, assign, or otherwise alienate or encumber such Units or the Shares issuable in settlement thereof, other than (i) to the person or persons to whom the Participant's rights under such Units pass by will or the laws of descent and distribution, (ii) to the spouse or the descendants of the Participant or to trusts for such

persons to whom or which the Participant may transfer such Units by gift, (iii) to the legal representative of any of the foregoing, or (iv) pursuant to a qualified domestic relations order as defined under Section 414(p) of the Internal Revenue Code of 1986, as amended (the "Code"), or a similar order or agreement pursuant to state domestic relations law (including a community property law) relating to the provision of child support, alimony payments, or marital property rights to a spouse, former spouse, child, or other dependent of the Participant. Any such transfer shall be made only in compliance with the Securities Act of 1933 and the requirements therefor as set forth by the Company. Any attempted transfer in contravention of the foregoing provisions shall be null and void and of no effect.

#### 1.5 <u>Change of Control Termination</u>.

(a) <u>Vesting Upon Change of Control Termination</u>. Notwithstanding any other provision of this Agreement, the Units shall become fully vested upon a Change of Control Termination. For purposes of this Agreement, a "Change of Control Termination" occurs upon the termination of the Participant's employment with the Company or a subsidiary thereof in the event that (i) a Change of Control (as defined in the Plan) of the Company occurs, and (ii) the Participant's employment with the Company or a subsidiary thereof is subsequently terminated without Cause (as defined below) or the Participant terminates his or her employment with the Company or a subsidiary thereof for Good Reason (as defined below), and such termination of employment occurs (x) within 30 months of the Change of Control and (y) prior to the normal completion of vesting of the Units. The normal vesting and settlement provisions in Article I of this Agreement shall not be affected by the first sentence of this subsection if a Change of Control of the Company or a subsidiary thereof. If the Participant has entered into a separate written Change of Control Executive Severance Agreement or Change of Control Severance Agreement (with either to be subsequently referred to herein as a "Change of Control Severance Agreement") with the Company, the terms "Cause" and "Good Reason" used herein shall have the meanings set forth in such Change of Control Severance Plan (the "Change of Control Severance Plan").

(b) <u>Settlement upon Change of Control Termination</u>. Notwithstanding any other provision of this Agreement to the contrary, in the event of a Change of Control Termination with respect to the Participant's employment with the Company or a subsidiary thereof as set forth in Section 1.5(a) above, the vested Units shall be settled either in Shares or in cash of equivalent value, as determined by the Committee or other duly authorized administrator of the Plan, in its discretion, within thirty (30) days following the effective date of the Change of Control Termination; provided, however, that the time and manner of such settlement shall comply with Section 409A of the Code as referred to in Section 2.11 of this Agreement.

(c) <u>Controlling Documents for Change of Control Termination</u>. To the extent that the Participant is subject to either a written Change of Control Severance Agreement or the Change of Control Severance Plan, the terms and conditions of such Change of Control Severance Agreement or Change of Control Severance Plan, as applicable, shall also apply to this Award in the event of a Change of Control Termination; provided, however, that with respect to the Units under this Award, the terms of the Plan and this Agreement shall control in the event of any inconsistency between their terms and the terms of the Change of Control Severance Plan.

#### ARTICLE II

#### GENERAL PROVISIONS

2.1 <u>Adjustments Upon Changes in Capitalization</u>. In the event that a stock split, stock dividend, or other similar change in capitalization of the Company occurs, the number and kind of Shares that may be issued under this Agreement and that have not yet been issued shall be proportionately and appropriately adjusted.

2.2 <u>No Dividend Equivalents or Stockholder Rights Until Shares Issued</u>. The Units shall not be credited with Dividend Equivalents. In addition, the Participant shall have no voting, transfer, liquidation, or other rights of a holder of Shares with respect to the Units until such time as Shares, if any, have been issued by the Company to the Participant in settlement of the Units. Until the Units are settled or terminated, they will represent only bookkeeping entries by the Company to evidence unfunded and unsecured obligations of the Company.

2.3 <u>Notices</u>. Any notice to the Participant relating to this Agreement shall be in writing and delivered in person or by mail, fax, or email transmission to the address or addresses on file with the Company. Any notice to the Company shall be addressed to it at its principal office, and be specifically directed to the attention of the Secretary. Anyone to whom a notice may be given under this Agreement may designate a new address by notice to that effect.

2.4 <u>Benefits of Agreement</u>. This Agreement shall inure to the benefit of and be binding upon each successor of the Company and the Participant's heirs, legal representatives, and permitted transferees. This Agreement and the Plan shall be the sole and exclusive source of any and all rights that the Participant and the Participant's heirs, legal representatives, and permitted transferees may have with respect to this Award, the Units, and the Plan.

2.5 <u>Resolution of Disputes</u>. Any dispute or disagreement that arises under, or is a result of, or in any way relates to, the interpretation, construction, or applicability of this Agreement shall be resolved as determined by the Committee, or the Board of Directors of the Company (the "Board"), or by any other committee appointed by the Board for such purpose. Any determination made hereunder shall be final, binding, and conclusive for all purposes.

2.6 <u>Controlling Documents</u>. The provisions of the Plan are hereby incorporated by reference into this Agreement. In the event of any inconsistency between this Agreement and the Plan, the Plan shall control.

2.7 <u>Amendments</u>. This Agreement may be amended only by a written instrument executed by both the Company and the Participant.

2.8 <u>No Right of Participant to Continued Employment</u>. Nothing contained in this Agreement or the Plan shall confer on the Participant any right to continue to be employed by the Company or any subsidiary thereof, or shall limit the Company's right to terminate the employment of the Participant at any time; provided, however, that nothing contained in this Agreement shall affect any separate contractual provisions that exist between the Participant and the Company or its subsidiaries with respect to the employment of the Participant.

2.9 <u>Vesting Dates and Settlement Dates</u>. In the event that any vesting date, settlement date, or any other measurement date with respect to this Award does not fall on a normal business day, such date shall be deemed to occur on the next following normal business day.

2.10 <u>Tax Withholding</u>. The Company may make such provisions and take such steps as it deems necessary or appropriate for the withholding of any taxes that the Company is required by law or regulation of any governmental authority, whether Federal, state, or local, to withhold in connection with the Units or Shares subject to this Agreement. The Participant shall elect, prior to any tax withholding event related to this Award and at a time when the Participant is not aware of any material nonpublic information about the Company and the Participant would be permitted to engage in a transaction in the Company's securities under the Company's Securities Trading Policy, whether the Participant will satisfy all or part of such tax withholding requirement by paying the taxes in cash or by having the Company withhold Shares having a fair market value equal to the minimum statutory withholding that may be imposed on the transaction (based on minimum statutory withholding rates for Federal, state, and local tax purposes, as applicable, that are applicable to such transaction). The Participant's election shall be irrevocable, made in writing, signed by the Participant, and shall be subject to any restrictions or limitations that the Committee, in its sole discretion, deems appropriate.

2.11 <u>Compliance with Section 409A of the Code</u>. Notwithstanding any provision in this Agreement to the contrary, to the extent that this Agreement constitutes a nonqualified deferred compensation plan or arrangement to which Section 409A of the Code applies, the administration of this Award (including the time and manner of payments under the Award and this Agreement) shall comply with Section 409A of the Code. In connection therewith, any settlement or payment to the Participant with respect to the Award under this Agreement which Section 409A(a)(2)(B)(i) of the Code indicates may not be made before the date which is six months after the date of the Participant's separation from employment service (the "Section 409A Six-Month Waiting Period"), as a result of the fact that the Participant is a specified key employee referred to in Section 409A(a)(2)(B)(i) of the Code, shall not occur or be made during the Section 409A Six-Month Waiting Period but rather shall be delayed, if such settlement or payment would otherwise occur during the Section 409A Six-Month Waiting Period, until the expiration of the Section 409A Six-Month Waiting Period.

2.12 Personal Data. The Participant hereby consents to the collection, use, and transfer, in electronic or other form, of the Participant's personal data as described in this Agreement by and among, as applicable, the Company and its affiliates for the exclusive purpose of implementing, administering, and managing the Participant's participation in the Plan. The Company holds, or may receive from any agent designated by the Company, certain personal information about the Participant, including, but not limited to, the Participant's name, home address and telephone number, date of birth, social security insurance number or other identification number, salary, nationality, job title, any shares of Common Stock held, details of this Award and any other rights to shares of Common Stock awarded, canceled, exercised, vested, unvested, or outstanding in the Participant's favor, for the purpose of implementing, administering, and managing the Plan, including complying with applicable tax and securities laws (the "Personal Data"). The Personal Data may be transferred to any third parties assisting in the implementation, administration, and management of the Plan. The Participant authorizes such recipients of the Personal Data to receive, possess, use, retain, and transfer the Personal Data, in electronic or other form, for the purposes described above. The Participant may, at any time, view the Personal Data, request additional information about the storage and processing of the Personal Data, require any necessary amendments to the Personal Data, or refuse or withdraw the consents herein, in any case without cost, by contacting the Secretary of the Company in writing. Any such refusal or withdrawal of

the consents herein may affect the Participant's ability to participate in the Plan.

2.13 <u>Electronic Delivery of Documents</u>. The Company may, in its sole discretion, deliver any documents related to this Award, or any future awards that may be granted under the Plan, by electronic means, or request the Participant's consent to participate in the Plan or other authorizations from the Participant in connection therewith by electronic means. The Participant hereby consents to receive such documents by electronic delivery and, if requested, to participate in the Plan through an on-line or electronic system established and maintained by the Company or another third party designated by the Company.

2.14 <u>Receipt of Award and Related Documents</u>. The Participant hereby acknowledges the receipt, either directly or electronically, of the Award, a copy of the Plan, and a prospectus for the Plan.

2.15 <u>Execution and Counterparts</u>. This Agreement may be executed in counterparts. Execution of a written instrument for this Agreement may be evidenced by any appropriate form of electronic signature or affirmative email or other electronic response attached to or logically associated with such written instrument, which is executed or adopted by a party with an indication of the intention by such party to execute or adopt such instrument for purposes of execution thereof.

IN WITNESS WHEREOF, the Company and the Participant have caused this Performance Stock Unit Award Agreement to be entered into effective as of the Award Date.

#### CERTIFICATION

I, Anthony J. Best, certify that:

- 1. I have reviewed this quarterly report on Form 10-Q of SM Energy Company;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

#### CERTIFICATION PURSUANT TO 18 U.S.C. SECTION 1350, AS ADOPTED PURSUANT TO SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

In connection with the Quarterly Report on Form 10-Q of SM Energy Company (the "Company") for the quarterly period ended September 30, 2011 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), Anthony J. Best, as President and Chief Executive Officer of the Company, and A. Wade Pursell, as Executive Vice President and Chief Financial Officer of the Company, each hereby certifies, pursuant to and solely for the purpose of 18 U.S.C. § 1350, as adopted pursuant to § 906 of the Sarbanes-Oxley Act of 2002, to the best of his knowledge and belief, that:

- (1) The Report fully complies with the requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m or 78o(d)); and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.
